Setup guide: WHMCS setup

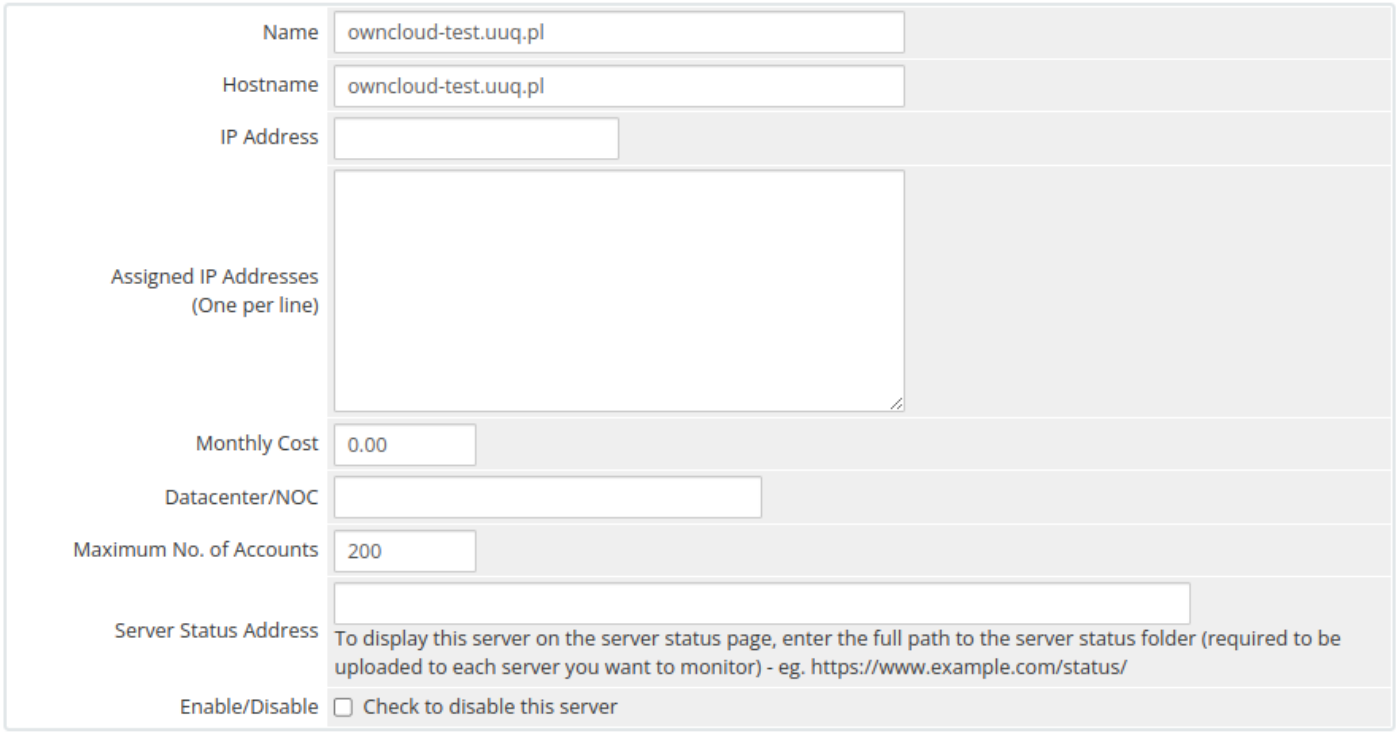

ownCloud module **WHMCS**

Order now | Download | Community

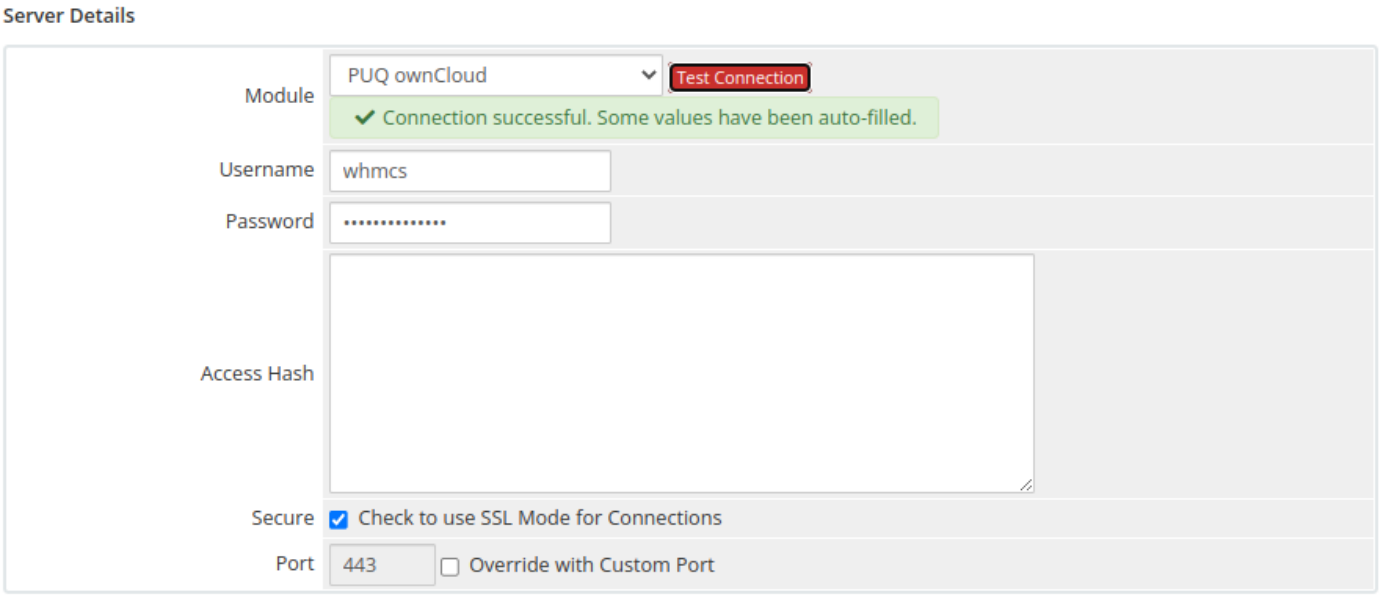

Step 1: Add server in WHMCS

Navigate to **System Settings → Servers → Add New Server**

1. Enter the correct **Name** and **Hostname**
2. In the Server Details section, select the **PUQ ownCloud** module
3. Enter valid ownCloud web interface credentials (username and password)
4. Click **Test connection** to verify the connection
