4. On the opened page, enter all the necessary information:

- **Name:** Displayed name of the server.
- **Maximum Number of Accounts:** The number of services that can be on this server.
- **Server Group:** Optionally, choose the server group.

- **IP Address or Domain:** The address of the ownCloud server you are connecting to.
- **Username/Password:** Username and Password on the ownCloud server.
- Check the **SSL** box if you want to use SSL-encrypted connection. If necessary, specify the port and perform a connection test.

The screenshot shows the 'Add New Server' configuration page in the PUQ ownCloud interface. The page has a header with 'Initial Settings' and 'All Modules' tabs, and the 'PUQ cloud' logo in the top right. The main content area is titled 'Add New Server' and contains a form with the following fields:

Server Name	owncloud-test.uuq.pl
Maximum Number of Accounts	23
Server Group	Default
Default	<input type="checkbox"/> Set as default server in group
IP Address or Domain	IP address or Domain of a server
Username	admin
Password	adminpass
SSL	<input checked="" type="checkbox"/> Connect using SSL
Port	443 <input type="checkbox"/> Change standard port
Test Connection	<input type="button" value="Test Connection"/>

At the bottom right of the form is a large green 'Add New Server' button. At the bottom left is a 'Turn Back' button.
