Client Area Overview

PUQ Page Manager module **WHMCS**

[Order now](#) | [Download](#) | [Community](#)

This page describes the client area interface and actions available to active service clients.

Accessing the Client Area

Pages are available via clean, search-engine-friendly URLs mapped by the administrator (e.g., `https://yourdomain.com/page-url-name/`).

Client Actions

Within the control area, clients can:

- **View Custom Pages:** Access seamlessly integrated custom pages in the WHMCS frontend.
- **Unlock Password Protected Pages:** Clients will be prompted with a secure login card to unlock the content if a page is password protected.

Visibility Settings

Pages can be restricted to specific user scopes:

1. **All Visitors:** Open to everyone.
2. **Guests Only:** Visible only to logged-out users.
3. **Clients Only:** Visible only to logged-in users.
4. **Client Groups:** Restricts access to members of specific client groups defined in WHMCS.
