

Activation and permissions

PUQ Page Manager module WHMCS

[Order now](#) | [Download](#) | [Community](#)

To activate the module and set up permissions, follow these steps:

1. Log in to your WHMCS Admin Area.
2. Navigate to **System Settings > Addon Modules** (or **Setup > Addon Modules** in older WHMCS versions).
3. Locate **PUQ Page Manager** in the list and click **Activate**.
4. Once activated, click **Configure** next to the module name.
5. In the configuration panel:
 - Enter your **License key** (provided upon purchase).
 - Under **Access Control**, select the administrative role groups (e.g., Full Administrator, Support) that are permitted to access and manage this module.
6. Click **Save Changes**.

» PUQ Page Manager

Create and manage custom pages with block editor, multilingual support, SEO optimization, templates, analytics, and WHMCS page rewrites.
