Overview Cards

Four cards at the top display key metrics:

Card	Description
Total Views	Total page views across all pages (all time)

Card	Description
Today	Page views recorded today
This Week	Page views for the current week
This Month	Page views for the current month

Views per Day

A horizontal bar chart showing the number of page views per day. Each bar represents one day with the exact view count displayed.

Top Pages

A table listing the most popular pages, sorted by total views:

Column	Description
Name	Page title
URL	Page URL slug
Total Views	Total number of views
Unique Views	Number of unique visitors

Revision #3
