# All Pages

The pages list displays all created pages in a table with the following columns:

Column	Description
--------	-------------

<b>ID</b>	Unique page identifier
<b>Name</b>	Page title
<b>URL</b>	The URL slug used to access the page
<b>Status</b>	Current status: Published, Draft, Scheduled, or Archived
<b>Views</b>	Total page view count
<b>Created</b>	Date and time when the page was created
<b>Actions</b>	Edit, view, duplicate, export, delete

## Add New Page

Click the **Add Page** button at the top of the pages list. A new page is created instantly via AJAX and you are redirected to the page editor.

## Page Editor

Clicking **Edit** on any page opens the page editor. The editor is organized into collapsible panels:

## General Settings

Field	Description
<b>Name</b>	Page title displayed in the browser tab and page header
<b>URL</b>	URL slug for the page (e.g., <code> my-page </code> → <code> yourdomain.com/index.php?m=puq_page_manager&amp;page=my-page </code> )
<b>Parent Page</b>	Optional parent page for hierarchical organization
<b>Sort Order</b>	Numeric value for sorting pages (lower = first)
<b>Status</b>	Draft, Published, Scheduled, or Archived

## Visibility & Access

Field	Description
-------	-------------

<b>Visibility</b>	Who can see the page: All Visitors, Guests Only, Clients Only, or Client Groups
<b>Required Login</b>	If enabled, visitors must log in to view the page
<b>Password Protection</b>	Protect the page with a password

## Content

The block widget editor (EditorJS) is the main content area. You can add, arrange, and configure widgets by clicking the + button or using the toolbar. Each widget block can be moved up/down, duplicated, or deleted.

## SEO

Field	Description
<b>OG Title</b>	Open Graph title for social media sharing
<b>OG Description</b>	Open Graph description
<b>OG Image</b>	Open Graph image URL
<b>Keyword(s)</b>	Meta keywords
<b>Canonical URL</b>	Canonical URL for SEO
<b>Meta Robots</b>	Meta robots directive (index/noindex, follow/nofollow)
<b>Schema JSON-LD</b>	Structured data in JSON-LD format
<b>Custom CSS</b>	Custom CSS styles for this page only
<b>Custom JS</b>	Custom JavaScript for this page only

## Languages

The Languages panel allows you to manage translations for the page. You can:

- Add translations for any language
- Copy content from another language
- Track translation status: **Translated, Needs Update, Not Translated**
- Delete translations

## Revisions

The Revisions panel shows the revision history for the page. Each revision stores a snapshot of the

page content. You can:

- Preview the content of any revision
  - Restore a previous revision with one click
- 

# Import / Export

- **Export Page** — export a single page as a JSON file (available from the page actions menu)
  - **Export All Pages** — export all pages as a single JSON file (available from the Settings page)
  - **Import Page** — import a page from a JSON file (available from the Settings page)
-
