Question Answer

PUQ Page Manager module **WHMCS**

Order now | Download | Community

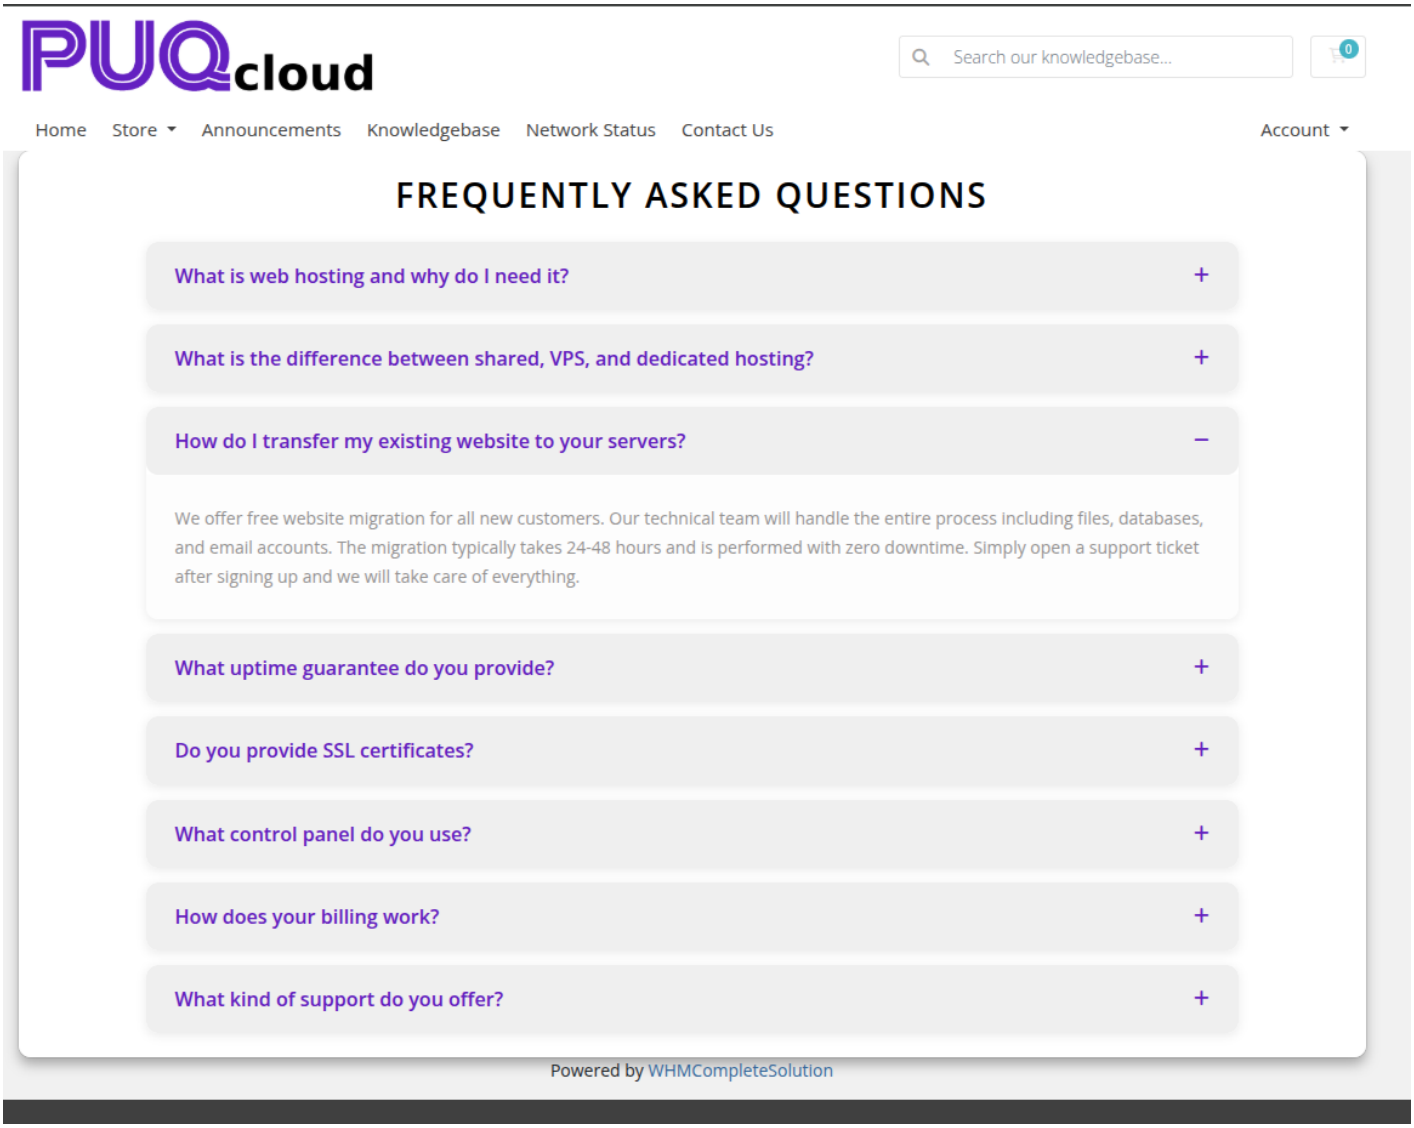

The Question Answer widget renders a FAQ or Q&A section with expandable answers. Each entry has a question and a rich-text answer. Ten visual styles are available, including accordion, grid, bubble, tabbed, and timeline layouts.

Settings

Layout

Setting	Description
width	Widget container width (e.g. `100%`, `900px`)
margin-top	Top margin of the widget block
margin-bottom	Bottom margin of the widget block

Setting	Description
Style	Visual style template (`puq`, `puq-border`, `puq-bubble`, `puq-cards`, `puq-grid`, `puq-minimal`, `puq-neon`, `puq-split`, `puq-tabs`, `puq-timeline`)

Colors

Setting	Description
Question text (`color_1`)	Color of the question text
Question panel (`color_2`)	Background color of the question panel
Question panel hover (`color_3`)	Background color of the question panel on hover
Answer text (`color_4`)	Color of the answer text
Answer panel (`color_5`)	Background color of the answer panel
Color 6 (`color_6`)	Additional accent color used by certain styles

Background

Setting	Description
Background image	URL of the background image for the widget container
Background color	Background color of the widget container
Disable Shadow	Remove the drop shadow from the widget container
Disable Radius top	Remove top corner rounding
Disable Radius bottom	Remove bottom corner rounding
Disable Background	Remove the background panel entirely
Full width	Stretch the widget to the full page width

Header

Setting	Description
Header	Heading text above the Q&A list (e.g. `Frequently Asked Questions`)
Text color	Color of the header text
Disable header	Hide the header text

Q&A Items

Use the **+** button to add question and answer pairs. Each row contains:

Field	Description
Question	The question text displayed in the collapsed panel
Answer	The answer content shown when the panel is expanded (supports rich text)

Items can be reordered with the up/down arrows and removed with the delete button.
