

Tabs / Accordion

Page Manager addon **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

The Tabs / Accordion widget renders content sections that are toggled by clicking a tab or accordion header. It supports two modes — tabbed navigation and collapsible accordion — with rich HTML content in each section body.

Consider your website traffic, storage needs, and budget. Start with shared hosting for small sites, upgrade to VPS as you grow, and use dedicated servers for high-traffic enterprise applications. Most providers offer easy upgrade paths. Consider your website traffic, storage needs, and budget.
