# Home screen

## PowerDNS module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

On the product's home page in the client area, there is a list of NS servers that the client needs to set up on their domain in the registrar's settings. There is also a list of zones with the ability to manage them.

## Information

Zones

2 / 6

Name server 1

ns1.puqcloud.com

Name server 2

ns2.puqcloud.com

Name server 3

ns3.puqcloud.com

Name server 4

ns4.puqcloud.com

# Add DNS Zone

## PowerDNS module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

When the "Add DNS Zone" button is clicked, a wizard for adding a new zone will open in a pop-up window.

# Managing DNS Records

## PowerDNS module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

To manage records, you need to click the "**Records**" button on the selected zone, and on the page that opens, you will be able to manage the records.
