PTR IPv4 and IPv6

PowerDNS module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

Module support PTR IPv4 and IPv6

The screenshot displays the WHMCS PowerDNS module interface. A modal window titled "Add Record .2.0.192.in-addr.arpa" is open, showing a form to add a new DNS record. The "Type" dropdown menu is open, with "PTR" highlighted. The form includes fields for "Name (required)" and "TTL" (set to 1 hr). Below the form are "Cancel" and "Add Record" buttons.

In the background, a table lists existing PTR records:

Type	Name	Content	TTL	Actions
PTR	3.2.0.192.in-addr.arpa	server3.example.com.	3600	[Edit] [Delete]
PTR	2.2.0.192.in-addr.arpa	server2.example.com.	3600	[Edit] [Delete]
PTR	1.2.0.192.in-addr.arpa	server1.example.com.	3600	[Edit] [Delete]

At the bottom of the interface, it says "Powered by WHMCompleteSolution".
