## PowerDNS module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

On the product's home page in the client area, there is a list of NS servers that the client needs to set up on their domain in the registrar's settings. There is also a list of zones with the ability to manage them.

## Information

|   |               |                                |
|---|---------------|--------------------------------|
|  | Zones         | 2 / 6                          |
|  | Name server 1 | ns1.puqcloud.com               |
|  | Name server 2 | ns2.puqcloud.com               |
|  | Name server 3 | ns3.puqcloud.com               |
|  | Name server 4 | ns4.puqcloud.com               |
|  | Actions       | <a href="#">+ Add DNS Zone</a> |
