Initial Setup and Access Control

Product Analytics addon **WHMCS**

Order now | Download | Community

After uploading the module files, you need to activate the module and configure roles and permissions inside WHMCS.

---

1. Activate the Addon

1. Log in to your WHMCS admin area.
2. Navigate to **System Settings > Addon Modules** (or **Setup > Addon Modules** in older versions).
3. Find **PUQ Product Analytics** in the list.
4. Click **Activate**.

---

2. Configure Settings & Permissions

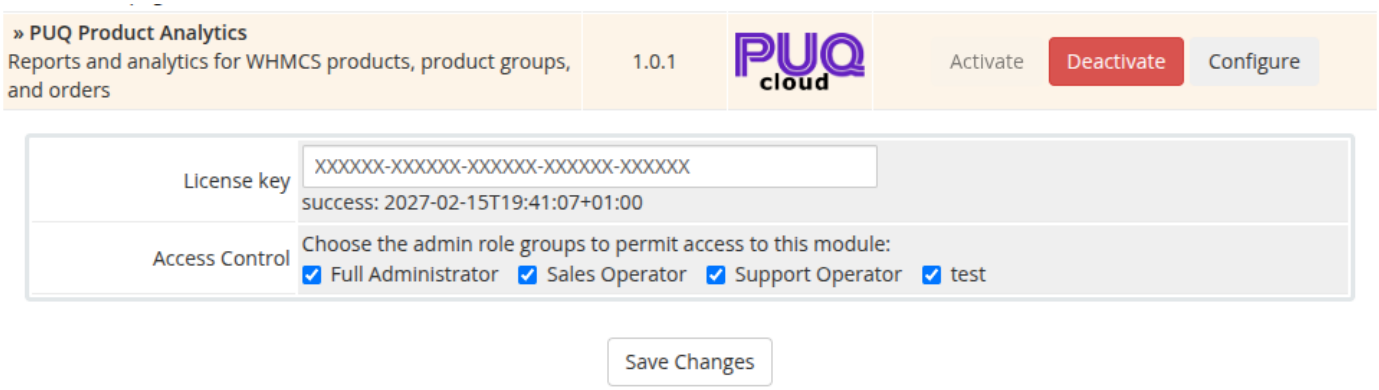

1. Click **Configure** next to PUQ Product Analytics.
2. Enter your license key in the **License key** field.
3. In **Access Control**, check the administrator role groups that are allowed to access and view the analytics (e.g., Full Administrator, Sales Operator, Support Operator, test).
4. Click **Save Changes**.

---

3. Verify Activation

Once settings are saved, the license validation status will display directly below the license key field:

- **Success status** (e.g., `success: 2027-02-15T19:41:07+01:00`) indicates that the module successfully validated its license and is ready.
