

Initial Setup and Access Control

Product Analytics addon **WHMCS**

[Order now](#) | [Download](#) | [Community](#)

After uploading the module files, you need to activate the module and configure roles and permissions inside WHMCS.

1. Activate the Addon

1. Log in to your WHMCS admin area.
 2. Navigate to **System Settings > Addon Modules** (or **Setup > Addon Modules** in older versions).
 3. Find **PUQ Product Analytics** in the list.
 4. Click **Activate**.
-

2. Configure Settings & Permissions

1. Click **Configure** next to PUQ Product Analytics.
 2. Enter your license key in the **License key** field.
 3. In **Access Control**, check the administrator role groups that are allowed to access and view the analytics (e.g., Full Administrator, Sales Operator, Support Operator, test).
 4. Click **Save Changes**.
-

3. Verify Activation

Once settings are saved, the license validation status will display directly below the license key field:

- **Success status** (e.g., `|success: 2027-02-15T19:41:07+01:00|`) indicates that the module successfully validated its license and is ready.
