Dashboard

Proxmox KVM module **WHMCS**

Order now | Download | Community

The addon module dashboard provides a quick overview of all managed resources.

addon-dashboard-home.png

Dashboard Cards

Card	Description
IP Pools	Total number of configured IP address pools
DNS Zones	Total number of configured DNS zones
KVM Services	Total number of active KVM services
VM Management	Link to the centralized VM management page
Settings	Link to the module settings

Navigation

The top navigation bar provides access to all addon sections:

- **Home** — Dashboard overview with quick stats and companion appliances
- **IP Pools** — IPv4/IPv6 address pool management

- **DNS Zones** — DNS zone configuration (Cloudflare, HestiaCP, PowerDNS)
- **VM Management** — Centralized VM monitoring, deployment logs, and manual state actions
- **SSH Keys** — Global client SSH public keys management
- **Settings** — General settings, timeouts, bulk queue, and cron configuration
- **Help** — Direct links to module documentation, companion Docker tools (PVE-OS-Builder, VNC Web Proxy), and official support
