

Jak ustawić harmonogram KOPII ZAPASOWYCH. Proxmox od PUQ.

Dla stworzenia zadania kopii zapasowej

1. Kliknij "Datacenter"
2. Kliknij "Kopia zapasowa"
3. Kliknij "Dodaj"
4. Ustaw parametry
5. Kliknij "Utwórz"

The screenshot shows the Proxmox VE 6.2-4 interface. The left sidebar shows the 'Datacenter (TEST)' tree. The 'Przestrzeń' menu is open, and 'Kopia zapasowa' is selected. The 'Dodaj' button is visible. The 'Utwórz: Punkt kopii zapasowej' dialog is open, showing configuration options for a backup task. The 'Utwórz' button is at the bottom right of the dialog.

| ID | Wzrost | Status | Nazwa | Typ |
|-----|---------------|-------------|-------------------|------|
| 100 | proxmox-te... | uruchomiona | pfSense | qemu |
| 101 | proxmox-te... | uruchomiona | TEST-DEBIAN | qemu |
| 102 | proxmox-te... | uruchomiona | TEST-WINDOWS-2019 | qemu |

Dla uruchomienia zadania poza harmonogramem, naciśnij na “Run now”

The screenshot shows the Proxmox VE 6.2-4 web interface. On the left, the 'Datacenter (TEST)' tree is expanded, showing three test environments: proxmox-test-1, proxmox-test-2, and proxmox-test-3. Each environment has associated backup and storage tasks. In the center, the 'Datacenter' tab is active, displaying a table of backup jobs. The first row is selected, showing a backup job for '100 (pfSense)' with a frequency of 'Poniedziałek-Niedziela' and a time of '15:00'. Above the table, there are buttons for 'Dodaj', 'Usuń', 'Edytuj', and 'Run now'. A red arrow points to the 'Run now' button. A confirmation dialog box titled 'Potwierdź' is overlaid on the interface, asking 'Start the selected backup job now?'. The dialog has two buttons: 'Tak' (Yes) and 'Nie' (No). A red arrow points to the 'Tak' button. The bottom of the interface shows a 'Logs' section.
