### Pages Manager

"Pages Manager" is an exceptional extension that will revolutionize your WHMCS experience by providing unparalleled customization options. This powerful tool allows you to elevate and enhance the standard WHMCS functionality to new heights.

With "Pages Manager," you can easily customize and tailor the frontend of your WHMCS and its default themes to reflect your unique brand identity. This extension empowers you to effortlessly create stunning custom pages using intuitive block widgets. Say goodbye to generic templates and embrace a fully personalized WHMCS interface that perfectly aligns with your business objectives.

The possibilities are endless with "Pages Manager." You have the freedom to redefine your WHMCS homepage and craft captivating product descriptions. Each custom page can be enriched with SEO tags, including OG title, OG description, OG image, and keywords, ensuring optimal search engine visibility and driving organic traffic to your website.

Furthermore, "Pages Manager" fully embraces multilingual capabilities, allowing you to create a truly global online presence. You can effortlessly create a multilingual website, where each page is individually tailored to the language preferences of your visitors. This level of flexibility goes beyond mere translation, as you can customize widget layouts and page elements to cater to the specific needs of each language audience, providing an unmatched level of customer-centricity.

Prepare to be impressed by the extensive collection of widgets at your disposal. The "Pages Manager" boasts a diverse range of widget options, each offering an extensive array of customization settings for colors, sizes, and styles. Our dedicated team of developers is continually crafting unique styles for each widget, ensuring that your website exudes professionalism and sophistication.

One of the standout features of "Pages Manager" is that all widgets come with their own independent CSS styles. This means that the appearance of the widgets remains consistent across any WHMCS theme you choose. However, should you encounter any compatibility issues with your current theme, rest assured that we are committed to providing prompt assistance and tailor-

made solutions to meet your specific requirements.

It is important to emphasize that "Pages Manager" is not just another theme or template for WHMCS. It is a comprehensive package of powerful widgets that seamlessly integrate with your existing WHMCS setup. This means you can enhance the capabilities of your WHMCS without interfering with your chosen theme.

Say goodbye to the need for expensive WHMCS themes. With "Pages Manager," you gain the power to customize and personalize the standard WHMCS templates such as "twenty one" and "six" to an extraordinary degree. This means you can achieve a level of customization that surpasses traditional theme options, all while saving costs and streamlining your online presence.

Unlock the true potential of your WHMCS with "Pages Manager." Experience unrivaled customization, enhanced user experience, and a level of personalization that will leave a lasting impression on your clients. Take control of your WHMCS frontend and embark on a journey of limitless possibilities.

Currently, "Pages Manager" offers the following widgets:

- **Text Editor TinyMCE:** a widely recognized text editor that provides limitless possibilities for textual and graphical content on your website.
- **Domain Search:** a widget that allows clients to search for desired domains and redirect them to the domain ordering page.
- **Domain TLD:** a visually appealing widget showcasing a list of domain TLDs, complete with prices and promotions.
- **Slider Logos:** an advertising slider displaying the logos of your business partners and affiliations.
- **Product Cards:** a configurable widget that beautifully presents and showcases groups of products on your website.
- **Team Slide:** a widget that enables you to create staff cards to showcase your team on your company information page.

We are continuously developing and implementing additional widgets, and we are open to your suggestions for new widget ideas.

# Configuration

## PUQ Customization module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

### Configuration

Pages Manager 

Enabled	<div>YES</div>	Enable or disable all custom functions
Rewrite home page	<div>YES</div>	If you need to rewrite the home page to a pre-prepared custom one.
Custom page for homepage	<div>Home2</div>	
Rewrite footer	<div>YES</div>	If you need to rewrite the footer to a pre-prepared custom one.
Custom page for footer	<div>footer</div>	

Save Changes

**Enabled** - Enabling or disabling all custom functions of this extension affects the automation and visibility of its features in the client area. When extension disabled, the automation capabilities and related features provided by the extension will not be active or visible to clients. However, as an administrator, you will still have access to configure and utilize the extension's functionalities through the administration interface. This gives you the flexibility to control the visibility and automation aspects of the extension based on your specific needs and preferences.

**Rewrite home page** - If you need to rewrite the home page to a pre-prepared custom one.

**Rewrite footer** - If you need to rewrite the footer to a pre-prepared custom one.

**Rewrite domain link** - If you need to rewrite the footer to a pre-prepared custom one.

To edit the newly created page and configure it for each language separately, please follow these instructions:

1. Locate the custom page you want to edit in the Page List table.
2. Find the corresponding row for the page and click on the page's name or edit button (if available) to access the page editing interface.
3. In the editing interface, you will find fields to modify the page details.
4. Update the "Name" field with the desired name for your page.
5. Set the "URL" field to your preferred URL slug, for example, "home" (without spaces or special characters).
6. Set the "Publish" parameter to "Yes" to make the page visible on your website.
7. Additionally, you have the option to enter the following parameters for better SEO optimization:
  - "OG title": Specify the Open Graph title for the page.
  - "OG description": Provide an Open Graph description for the page.
  - "OG image": Enter the URL or select an image for the Open Graph representation.
  - "Keyword(s)": Add relevant keywords for the page, separated by commas.
8. If you have multiple languages enabled in WHMCS, you will see language tabs or a language dropdown menu in the editing interface.
9. Select the desired language tab or choose the appropriate language from the dropdown menu.
10. Modify the page content, settings, and SEO parameters specifically for the selected language.
11. Repeat steps 9 and 10 for each language you want to customize the page for.
12. Once you have finished editing the page for all desired languages, save your changes.

By following these instructions, you can edit and configure the custom page individually for each language, allowing you to provide tailored content and settings to your website visitors based on their language preferences.

What are the different types of web hosting?		
There are various types of web hosting, including shared hosting, virtual private server (VPS) hosting, dedicated server hosting, and cloud hosting. Each type offers different levels of resources and control.		
What is VPS hosting?		
VPS hosting, or virtual private server hosting, involves partitioning a physical server into multiple virtual servers. Each virtual server operates independently, allowing users to have their own dedicated resources and control.		
What are the benefits of VPS hosting?		
VPS hosting provides several advantages, such as improved performance, scalability, customization options, enhanced security, and root access to the server. It offers a balance between shared hosting and dedicated servers.

## Admin configuration

The screenshot displays the 'Intelligent Domain Search' configuration panel in the WHMCS admin interface. The panel is organized into a sidebar on the left and a main configuration area on the right. The sidebar contains a menu icon, the widget title 'Intelligent Domain Search', a unique identifier '#56K8grYegU', and a list of configuration sections. The main area contains the settings for each section, including dimensions, colors, background, and text labels.

Section	Configuration Options
General	width: [input], margin-top: [input], margin-bottom: [input], Style: puq (dropdown)
Color	Color 1: [purple swatch], Color 2: [teal swatch], Color 3: [black swatch], Color 4: [black swatch], Color 5: [black swatch], Color 6: [black swatch]
Background image/color	[input], <input type="checkbox"/> Disable Shadow, <input type="checkbox"/> Disable Radius top, <input type="checkbox"/> Disable Radius bottom, <input type="checkbox"/> Disable Background, <input type="checkbox"/> Full width
