Show Services IP, Username

The extension allows for displaying the IP address and/or username of services in the service list within the client area. This feature enables clients to conveniently identify their services, especially when they have multiple ones.

Additionally, the extension allows adding the IP address and/or username of a service to the description of the corresponding item on the invoice. This functionality proves useful for both clients and you as it helps in identifying the service in relation to its position on the invoice.

The extension's configuration includes the following options:

1. Show IP on the invoices: This option determines whether the IP address should be displayed on the invoices.
2. Show IP in the lists of services in the client area: This option controls the display of the IP address in the service lists within the client area.
3. Show Username on the invoices: This option specifies whether the username should be shown on the invoices.
4. Show Username in the lists of services in the client area: This option governs the visibility of the username in the service lists within the client area.

These configuration settings provide flexibility in choosing which elements to display, allowing you to customize the visibility of IP addresses and usernames according to your preference and the needs of your clients.

To show Username in the lists of services in the client area	YES	

Save Changes

Enabled - Enabling or disabling all custom functions of this extension affects the automation and visibility of its features in the client area. When extension disabled, the automation capabilities and related features provided by the extension will not be active or visible to clients. However, as an administrator, you will still have access to configure and utilize the extension's functionalities through the administration interface. This gives you the flexibility to control the visibility and automation aspects of the extension based on your specific needs and preferences.

Show IP on the invoices - This option determines whether the IP address should be displayed on the invoices.

Show IP in the lists of services in the client area - This option controls the display of the IP address in the service lists within the client area.

Show Username on the invoices - This option specifies whether the username should be shown on the invoices.

Show Username in the lists of services in the client area - This option governs the visibility of the username in the service lists within the client area.

Displaying a list of services in the client area has been introduced

The screenshot displays the PUQ cloud client area interface. At the top, there is a navigation bar with links for Home, Client Area, Services, Domains, Billing, Support, and Open Ticket. A search bar for the knowledgebase and a shopping cart icon are also present. The main content area is titled 'My Products & Services' and shows a list of 23 services. The services are displayed in a table with columns for Product/Service, Pricing, Next Due Date, and Status. The services include Business-VPN 100, KVM 2/2/10 real IP, and MinIOS3 1 GB. The status of each service is indicated by a colored button (Active, Terminated, or Suspended).
