Client Overview Widget

PUQ Customization module **WHMCS**

Order now | Download | FAQ

The extension adds a data panel in the admin panel for viewing and editing client information. This panel includes the following data:

- Client Type: Indicates the type of client.
- Home Company: Displays the home company associated with the client.
- Tax Rule Number: Shows the number of the tax rule applicable to the client.
- VIES Status: Indicates the status of VIES (VAT Information Exchange System) validation for the client's VAT number, with "Valid" indicating a successful validation. It also displays the date of the last validation.
- Tax Exemption: Indicates if the client is exempt from tax.

These details provide quick access to essential information related to the client's tax status and company association.
