Configuration

PUQ Customization module **WHMCS**

Order now | Download | FAQ

Enabled - Enabling or disabling all custom functions of this extension affects the automation and visibility of its features in the client area. When extension disabled, the automation capabilities and related features provided by the extension will not be active or visible to clients. However, as an administrator, you will still have access to configure and utilize the extension's functionalities through the administration interface. This gives you the flexibility to control the visibility and automation aspects of the extension based on your specific needs and preferences.

Cron:

- Daily Cron: Selects the daily cron job to handle tasks.
- Each Cron: Selects the Each cron job to handle tasks.

Enabled Intelligent Search - Enables the Intelligent Search feature, which extends the search capabilities to include custom searches and return results for entries that may not be searchable using standard search functions. (integrates smoothly with the WHMCS search system)

Next, there is a list with data fields that will participate in searches integrated into WHMCS. For a more precise search, select the required fields.
