Enabled - Enabling or disabling all custom functions of this extension affects the automation and visibility of its features in the client area. When extension disabled, the automation capabilities and related features provided by the extension will not be active or visible to clients. However, as an administrator, you will still have access to configure and utilize the extension's functionalities through the administration interface. This gives you the flexibility to control the visibility and automation aspects of the extension based on your specific needs and preferences.

Show IP on the invoices - This option determines whether the IP address should be displayed on the invoices.

Show IP in the lists of services in the client area - This option controls the display of the IP address in the service lists within the client area.

Show Username on the invoices - This option specifies whether the username should be shown on the invoices.

Show Username in the lists of services in the client area - This option governs the visibility of the username in the service lists within the client area.
