Configuration

PUQ Customization module **WHMCS**

Order now | Download | FAQ

Enabled - Enabling or disabling all custom functions of this extension affects the automation and visibility of its features in the client area. When extension disabled, the automation capabilities and related features provided by the extension will not be active or visible to clients. However, as an administrator, you will still have access to configure and utilize the extension's functionalities through the administration interface. This gives you the flexibility to control the visibility and automation aspects of the extension based on your specific needs and preferences.

Default Payment Method — The payment method used by default when orders are created automatically. You can choose any of the payment gateways configured in WHMCS. This ensures newly created orders are immediately linked to the correct payment method, with no additional manual changes required.
