Enabled - Enabling or disabling all custom functions of this extension affects the automation and visibility of its features in the client area. When extension disabled, the automation capabilities and related features provided by the extension will not be active or visible to clients. However, as an administrator, you will still have access to configure and utilize the extension's functionalities through the administration interface. This gives you the flexibility to control the visibility and automation aspects of the extension based on your specific needs and preferences.

On the configuration page, you have the option to enable or disable the following features:

1. Disabled main menu: When set to "YES," the main menu will not be available to non-logged-in users.
2. Disabled account menu: When set to "YES," the account menu will not be available to non-logged-in users.
3. Allow password reset: When set to "YES," non-logged-in users will have the option to reset their passwords.
4. Allow registration: When set to "YES," non-logged-in users will have the option to register for an account.

By configuring these options, you can customize the access and functionality available to non-logged-in users. Enabling or disabling these features allows you to control the user experience and

tailor it to your specific requirements.
