Pages Manager

"Pages Manager" is an exceptional extension that will revolutionize your WHMCS experience by providing unparalleled customization options. This powerful tool allows you to elevate and enhance the standard WHMCS functionality to new heights.

With "Pages Manager," you can easily customize and tailor the frontend of your WHMCS and its default themes to reflect your unique brand identity. This extension empowers you to effortlessly create stunning custom pages using intuitive block widgets. Say goodbye to generic templates and embrace a fully personalized WHMCS interface that perfectly aligns with your business objectives.

The possibilities are endless with "Pages Manager." You have the freedom to redefine your WHMCS homepage and craft captivating product descriptions. Each custom page can be enriched with SEO tags, including OG title, OG description, OG image, and keywords, ensuring optimal search engine visibility and driving organic traffic to your website.

Furthermore, "Pages Manager" fully embraces multilingual capabilities, allowing you to create a truly global online presence. You can effortlessly create a multilingual website, where each page is individually tailored to the language preferences of your visitors. This level of flexibility goes beyond mere translation, as you can customize widget layouts and page elements to cater to the specific needs of each language audience, providing an unmatched level of customer-centricity.

Prepare to be impressed by the extensive collection of widgets at your disposal. The "Pages Manager" boasts a diverse range of widget options, each offering an extensive array of customization settings for colors, sizes, and styles. Our dedicated team of developers is continually crafting unique styles for each widget, ensuring that your website exudes professionalism and sophistication.

One of the standout features of "Pages Manager" is that all widgets come with their own independent CSS styles. This means that the appearance of the widgets remains consistent across any WHMCS theme you choose. However, should you encounter any compatibility issues with your

current theme, rest assured that we are committed to providing prompt assistance and tailor-made solutions to meet your specific requirements.

It is important to emphasize that "Pages Manager" is not just another theme or template for WHMCS. It is a comprehensive package of powerful widgets that seamlessly integrate with your existing WHMCS setup. This means you can enhance the capabilities of your WHMCS without interfering with your chosen theme.

Say goodbye to the need for expensive WHMCS themes. With "Pages Manager," you gain the power to customize and personalize the standard WHMCS templates such as "twenty one" and "six" to an extraordinary degree. This means you can achieve a level of customization that surpasses traditional theme options, all while saving costs and streamlining your online presence.

Unlock the true potential of your WHMCS with "Pages Manager." Experience unrivaled customization, enhanced user experience, and a level of personalization that will leave a lasting impression on your clients. Take control of your WHMCS frontend and embark on a journey of limitless possibilities.

Currently, "Pages Manager" offers the following widgets:

- **Text Editor TinyMCE**: a widely recognized text editor that provides limitless possibilities for textual and graphical content on your website.
- **Domain Search**: a widget that allows clients to search for desired domains and redirect them to the domain ordering page.
- **Domain TLD**: a visually appealing widget showcasing a list of domain TLDs, complete with prices and promotions.
- **Slider Logos**: an advertising slider displaying the logos of your business partners and affiliations.
- **Product Cards**: a configurable widget that beautifully presents and showcases groups of products on your website.
- **Team Slide**: a widget that enables you to create staff cards to showcase your team on your company information page.

We are continuously developing and implementing additional widgets, and we are open to your suggestions for new widget ideas.
