926	DE-PRO-124	2024-02-13	2024-02-18	Unpaid	5011	Hosting	1.00	2024-02-18	Julia Noga

#### Invoices for delete

[Run action Delete](#)

Invoice Id	Invoice Num	Invoice Date	Invoice Due date	Invoice Status	Item Relid	Item Type	Item Amount	Item Due date	Client
------------	-------------	--------------	------------------	----------------	------------	-----------	-------------	---------------	--------

**Invoices for cancel** - Unpaid invoices whose products have a status of cancelled and the termination date of the products is not closer than a month ago to the current date.

**Invoices for delete** - Invoice items that have a status of cancelled and the termination date of the products is not closer than a month ago to the current date.

All of this happens automatically as described in the configuration you've set up, but there's also the option to perform all actions manually.

**Run action Cancel** - Manual execution of the function that changes the status of all unpaid invoices whose products have a status of cancelled, and the termination date of the products is not closer than a month ago to the current date, to cancelled.

**Run action Delete** - Manual execution of the function that deletes invoice items that have a status of cancelled and the termination date of the products is not closer than a month ago to the current date.
