### Client Profile

The screenshot shows the 'Client Profile' page for 'Ruslan Poloviyi (TEST sp. z o. o.) - #1'. The page has a navigation bar with tabs: Summary, Profile, Users, Contacts, Products/Services, Domains, Billable Items, Invoices, Quotes, Transactions, Tickets, Emails, Notes (0), and Log. The 'Summary' tab is active. Below the tabs, there's a header for '#1 - Ruslan Poloviyi' and a status bar with 'Exempt from Tax: No', 'Auto CC Processing: No', 'Send Overdue Reminders: Yes', and 'Apply Late Fees: Yes'. The main content area is divided into three columns. The rightmost column, titled 'Other Actions', contains a toggle switch for 'Disable auto apply credit' which is currently turned on, with the text 'NOW: Credits applied automatically' below it. At the bottom of the page, there is a 'Create Invoice' button.

To enable the administrator to manage the toggling of automatic credit application for a client, there is a position in the "Other Actions" menu on the client's summary tab. From there, it is possible to individually enable or disable credit application for that specific client.

This feature provides convenient access for administrators to modify the auto apply credit setting on a per-client basis, allowing them to customize the credit management experience for each client as needed.
