

General: General Settings

PUQcloud Panel

[Order Now](#) | [Download](#) | [FAQ](#)

The "General" section of the PUQ Cloud Panel, found under **Settings > General**, provides essential configurations for the system's operation. This section is divided into two main tabs: **Time Based** and **Social**. Each tab offers specific fields and settings tailored for managing system logs and social media integration.

Time Based Tab

- **Activity Log History:**

- **Description:** Determines how long system activity logs are stored.
- **Purpose:** Helps monitor system-wide events and troubleshoot issues effectively.

- **Module Log History:**

- **Description:** Defines the retention duration for logs related to module actions.
- **Purpose:** Essential for reviewing module performance and debugging.

- **Notification History:**

- **Description:** Configures the number of days to keep logs of notifications sent by the system.
- **Purpose:** Ensures accountability and helps resolve notification-related issues.

- **Task Queue History:**

- **Description:** Specifies how long task queue logs should be retained.
- **Purpose:** Provides insights into task executions and supports debugging.

- **Completed Task Queue History:**

- **Description:** Sets the retention period for completed tasks in the queue.

- Purpose: Helps maintain an overview of successfully executed tasks.

Social Tab

The **Social** tab enables the integration of social media and communication platforms, allowing users to link their profiles and maintain a consistent online presence. Below are the fields available in this tab:

The screenshot shows the 'Social' tab in a settings interface. The 'Social' section contains the following fields:

- Facebook:** Enter the profile or page URL.
- YouTube:** Enter your YouTube channel URL.
- GitHub:** Enter your GitHub username or URL.
- Instagram:** Provide the username or profile link for Instagram.
- LinkedIn:** Enter the company page URL for LinkedIn. (Individual profiles are not supported.)
- WhatsApp:** Specify the registered phone number for WhatsApp, including the country code.
- Twitter:** Add the Twitter handle or URL.
- Viber:** Enter the Viber username or phone number.
- Telegram:** Input the Telegram username or phone number.
- BitBucket:** Add the username or URL for BitBucket.
- Discord:** Provide the invite URL for Discord servers or groups.
- Flickr:** Include the profile link for Flickr.
- Gitter:** Provide the Gitter chat room or profile URL.
- Vimeo:** Include the profile URL for Vimeo.

Conclusion

The "General" section is pivotal for configuring the system's operational and social settings. With its comprehensive fields in **Time Based** and **Social** tabs, administrators can maintain optimal log retention policies and integrate social platforms seamlessly. This ensures streamlined operations and enhanced connectivity with clients and stakeholders.
