

# Manage Dashboard

## PUQcloud Panel

[Order Now](#) | [Download](#) | [FAQ](#)

On the PUQcloud dashboard, you can see basic information such as:

- **Task Queue** – Live information about all task statuses, including Queued, Pending, Completed, Failed, Processing, and Duplicate.
- **Automation Status** – Information about Cron and Horizon statuses.
- **PUQcloud Info** – General information about the panel.
- **Staff Online** – A list of currently online staff members.

You can also manage the widgets on the dashboard.

Click the **gear icon** in the bottom-left corner.

Toggle widgets on or off as needed.

The image shows a dashboard interface. On the left, a sidebar contains a search icon and the text 'i PUQCloud Info'. Below this, a list of system metrics is displayed in a table-like format:

<b>PUQCloud:</b> v1.0.0-beta.2
<b>Uptime:</b> up 11 weeks, 19 minutes
<b>PHP:</b> 8.2.14
<b>Software:</b> Apache/2.4.62 (Debian) mod_fcgid/2.3.9 OpenSSL/1.1.1w
<b>Laravel Time Zone:</b> America/Winnipeg
<b>Laravel Time:</b> 2025-07-28 08:55:54
<b>PHP Time Zone:</b> America/Winnipeg
<b>PHP Time:</b> 2025-07-28 08:55:54
<b>MySQL Time Zone:</b> +00:00
<b>MySQL Time:</b> 2025-07-28 13:55:54

At the bottom of the sidebar is a yellow gear icon. To the right of the sidebar is a settings panel with four sections, each with a green 'On' toggle switch:

- PUQCloud Info** (Information about PUQCloud)
- Automation Status** (Show statuses Cron and Horizon)
- Task Queue** (Show Task Queue)
- Staff Online** (Show Staff Online)

Four red arrows point to the 'On' toggle switches for each of these sections.

You can also rearrange any widget by simply dragging it to your preferred location.
