The concept of backups

Backups are designed to create a backup copy of the server settings and then restore it on a new server or on the same server.

What settings are not included in the backup:

- System users
- Panel Web Interface SSL Certificates
- License
- Backup settings
- Optionally, you can exclude traffic statistics for VPN users

Backup options

- It is possible to manually create backups (with statistics of VPN users and without statistics)
- The ability to install an automatic backup scheduler
- Ability to send a backup to a remote FTP server
- Limiting the number of backups
- Ability to upload a backup to the system and recover

Backup list

[Order now](#) | [Download](#) | [FAQ](#)

Backup settings are available in the **Settings->Backups** menu item

The screenshot shows the PUQVPNCP web interface. The top navigation bar includes the logo, a help link, a user profile (ruslan (79.184.24.43)), and a logout button. The left sidebar contains a 'Settings' section with 'Backups' highlighted. The main content area is titled 'Backups' and features three buttons: 'Create', 'Create without statistics', and 'Configuration'. Below these is a file upload section with a 'Choose File' button, a 'No file chosen' status, and an 'Upload' button. The main part of the interface is a table listing backups.

Name	Size	Creation

dev.softkeel.com_2023-01-16_10-22-31.zip	5.9001 MB	2023-01-16 10:22:42.628790159 +0100 CET	Download	Delete	Restore
dev.softkeel.com_2023-01-13_16-07-22.zip	0.2669 MB	2023-01-13 16:07:22.50148271 +0100 CET	Download	Delete	Restore
dev.softkeel.com_2023-01-13_16-07-20.zip	0.2669 MB	2023-01-13 16:07:20.30148786 +0100 CET	Download	Delete	Restore

On this page you get a list of available backups.

There are function buttons:

- **Download** - To download a backup to a local computer
- **Delete** - In order to delete the backup on the server (does not delete the backup on the FTP server)
- **Restore** - In order to restore the entire configuration of the PUQVPNCP panel from a backup.

On this page there are buttons for creating backups:

- **Create** - Creates a full backup
- **Create without statistics** - Create a full backup and exclude traffic usage statistics for VPN users

There is also an **Upload** button with which you can upload a backup to the server

Automatic backup scheduler

[Order now](#) | [Download](#) | [FAQ](#)

In order to go to the automation settings of the backup scheduler
Go to **Settings->Backups->Configuration**

The screenshot shows the PUQVPNCP web interface. The top navigation bar includes the logo, a help link, the user name 'ruslan (79.184.24.43)', and a logout button. The left sidebar contains a menu with 'Dashboard', 'VPN servers', 'VPN accounts', 'Settings', and 'About us'. Under 'Settings', there are links for 'System', 'Firewall', 'DNS', 'Traffic logging', 'Backups' (highlighted), 'One-time link', 'System users', 'API', and 'License'. The main content area is titled 'Backups' and features three buttons: 'Create', 'Create without statistics', and 'Configuration' (highlighted). Below these buttons is a file upload section with a 'Choose File' button, the text 'No file chosen', and an 'Upload' button. A table lists five backup files with columns for Name, Size, Creation, and actions (Download, Delete, Restore). The 'Delete' buttons in the table are highlighted.
