How to recover password

Problem: Username or password were lost

Solution:

In order to restore the default account, you must

- delete directory with accounts(**All system access accounts will be deleted**)

```
rm -R /usr/local/puqvpncp/users
```

- Restart the **puqvpncp** service

```
service puqvpncp restart
```

after these steps, the system creates a default user
Username: admin
Password: admin
