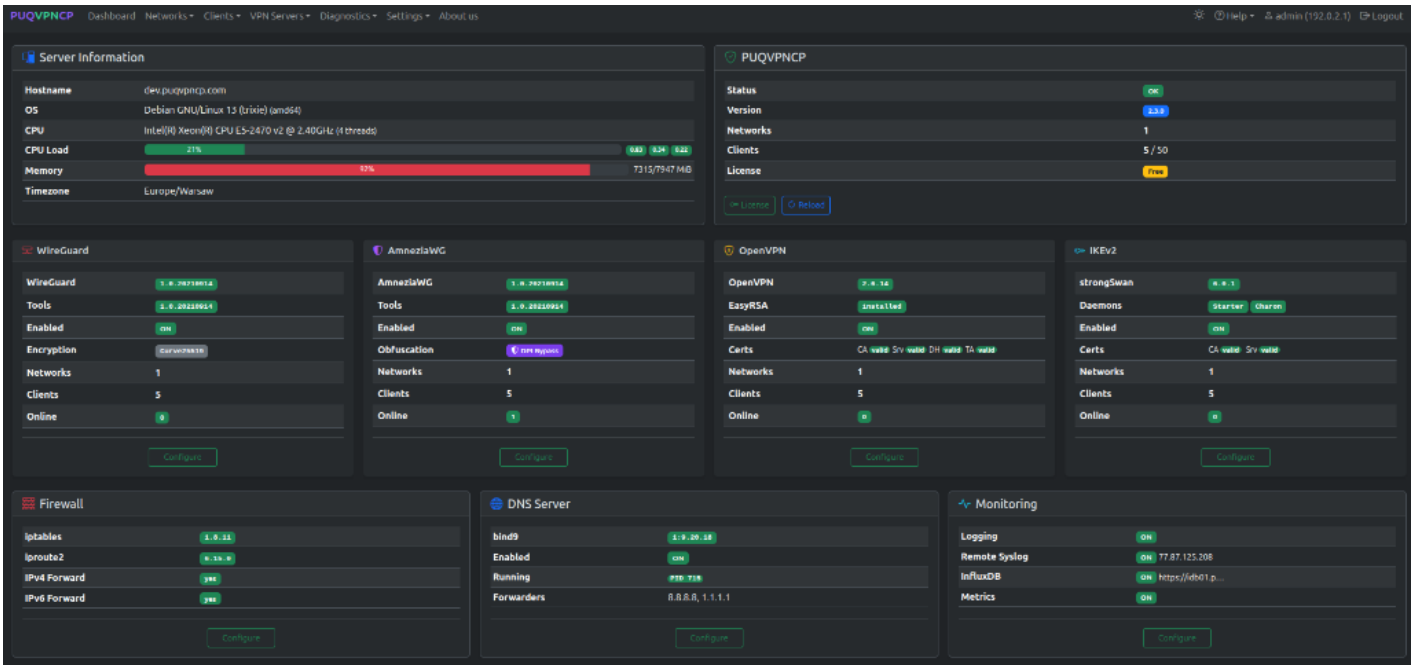
04. Dashboard

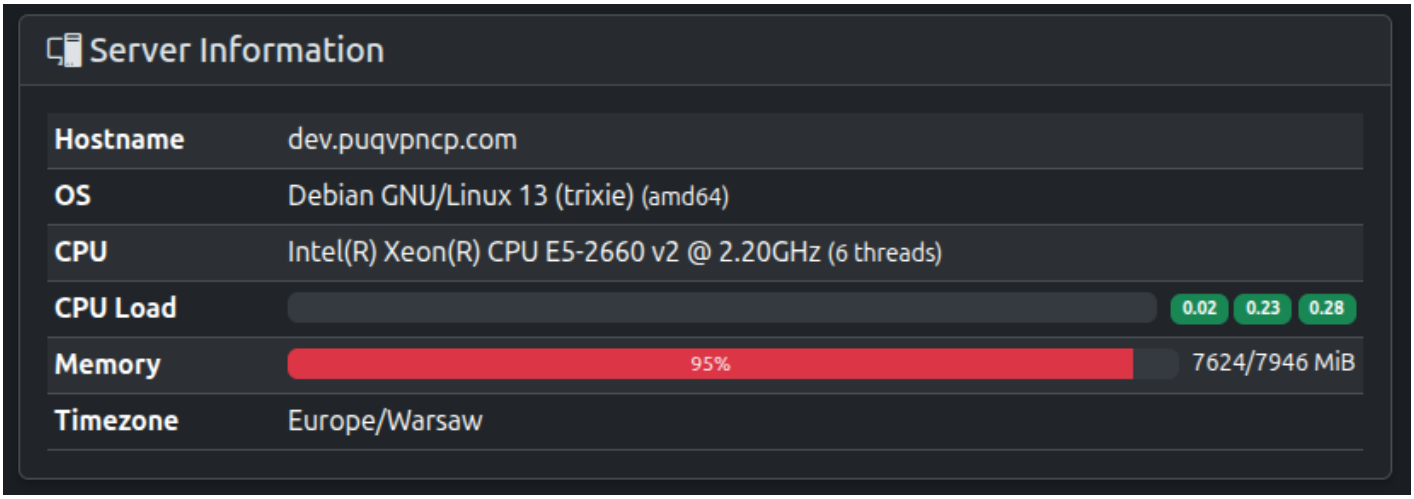
The Dashboard is the main landing page after login. It provides a complete overview of the server status, VPN protocols, and services.



PUQVPNCP v2.4 Dashboard — Server info, system status, 4 VPN protocols (WireGuard, AmneziaWG, OpenVPN, IKEv2), and services

---

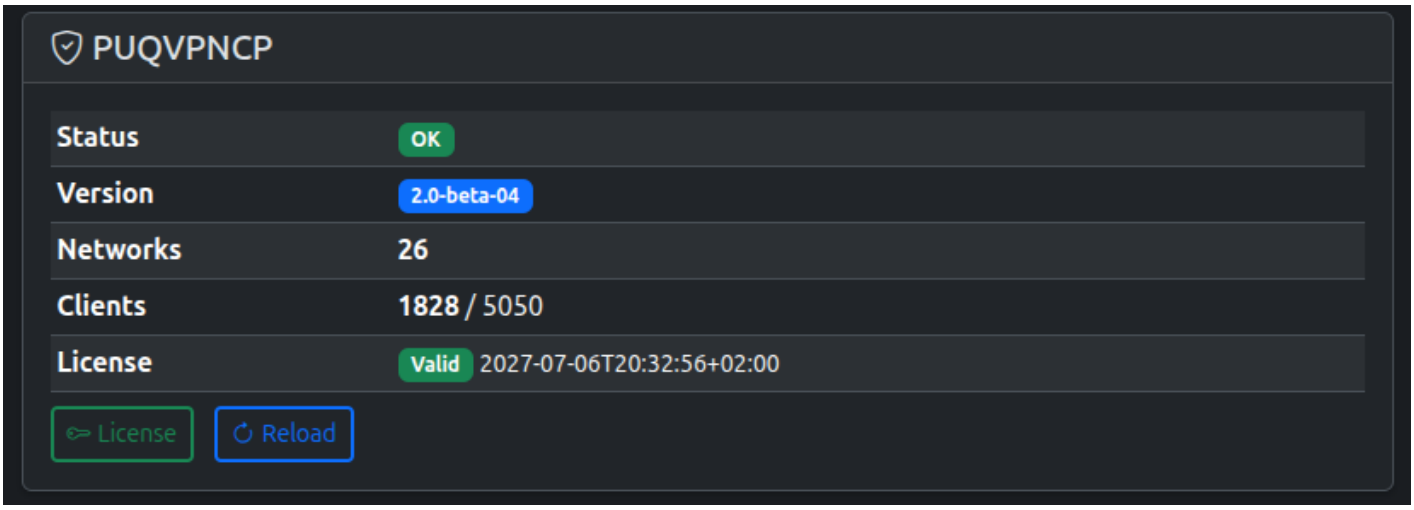
Server Information



Server information card

Field	Description
Hostname	Server FQDN
OS	Operating system and architecture
CPU	Processor model and thread count
CPU Load	1 / 5 / 15 minute load averages
Memory	Used / total with percentage bar
Timezone	Server timezone

PUQVPNCP Status



PUQVPNCP status card

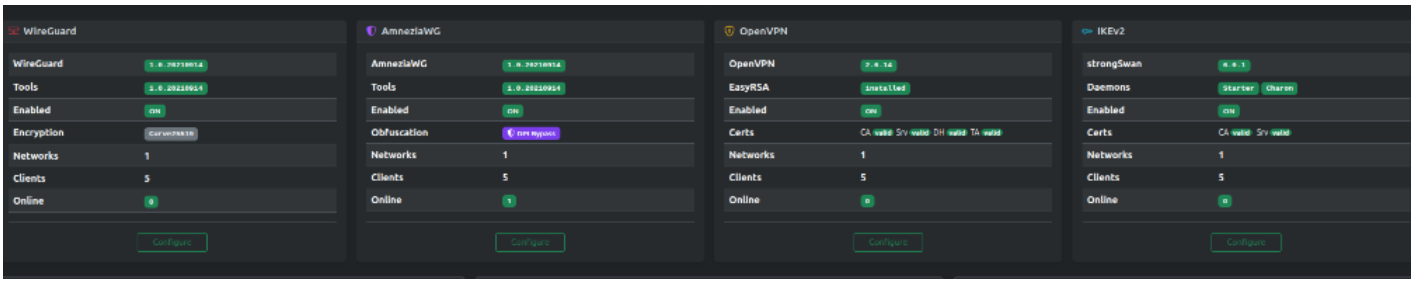
Field	Description
Status	`OK` = fully loaded, `Loading` = starting up

Field	Description
Version	Current software version
Networks	Total number of configured networks
Clients	Active clients / license limit
License	Validity status and expiration date

Quick action buttons:

- **License** — go to the license management page
- **Reload** — reload all VPN configurations (equivalent to system restart)

VPN Protocols



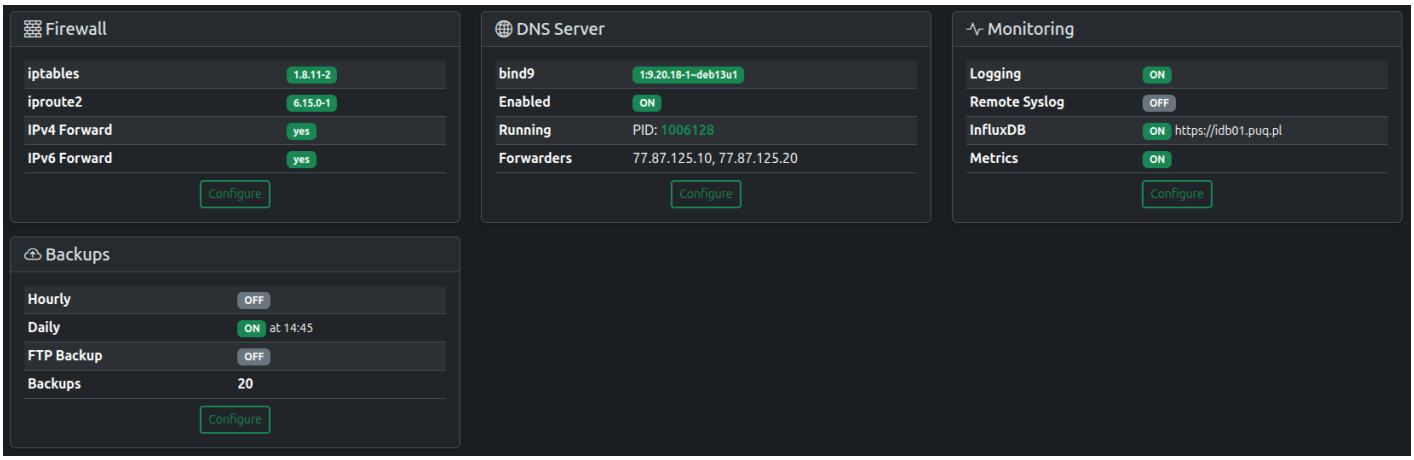
Four VPN protocol status cards: WireGuard, AmneziaWG, OpenVPN, IKEv2

Each protocol card displays:

Field	Description
Version / Package	Installed package version (`wireguard`, `amneziawg`, `openvpn`, `strongswan`)
Enabled	ON/OFF operational status
Encryption / Obfuscation	Cryptographic cipher or obfuscation mode (e.g., Curve25519, DPI Bypass)
Networks	Number of networks with this protocol enabled
Clients	Total clients configured across those networks
Online	Currently connected active peers/sessions

Click **Configure** on any card to go directly to that protocol's global settings page.

Services



Service cards with detailed configuration info

Firewall

- iptables and iproute2 versions
- IPv4/IPv6 forwarding status

DNS Server

- bind9 version and running PID
- Configured forwarders

Monitoring

- Logging, remote syslog, InfluxDB, and metrics status

Backups

- Hourly/daily backup schedule
- FTP backup status
- Total backup count
