On this page you get a list of available backups.

There are function buttons:

- **Download** - To download a backup to a local computer
- **Delete** - In order to delete the backup on the server (does not delete the backup on the FTP server)
- **Restore** - In order to restore the entire configuration of the PUQVPNCP panel from a backup.

On this page there are buttons for creating backups:

- **Create** - Creates a full backup
- **Create without statistics** - Create a full backup and exclude traffic usage statistics for

There is also an **Upload** button with which you can upload a backup to the server

---
