

# Basic settings and customization

[Order now](#) | [Download](#) | [FAQ](#)

One-time link is needed in order to transfer the VPN connection configuration to the client in a secure way.

One-time link configuration is available in the menu item **Settings->One-time link**

The screenshot shows the 'One-time link' configuration page in the PUQVPNCP web interface. The page has a dark header with the logo 'PUQVPNCP' on the left and navigation links '? HELP?', 'ruslan (79.184.3.204)', and 'Logout' on the right. A left sidebar contains a menu with items: Dashboard, VPN servers, VPN accounts, Settings (with sub-items: System, Firewall, DNS, One-time link, System users, API, License), and About us. The main content area is titled 'One-time link' and includes several tabs: 'Save', 'Set default', 'Active Links List', 'Wireguard section', and 'IKEv2 section'. The configuration fields are as follows:

- Lifetime in day:** A text input field containing the value '10'.
- Title:** A text input field containing the value 'One-time link'.
- CSS:** A text area containing the following CSS code:

```
* {
    background-color: #E5E5E5;
    text-align: center;
}

.wireguard,.ikev2 {
    margin: auto;
    width: 550px;
    text-align: center;
}
```
- Before body:** A text area containing the HTML code: `<h1>This is a one-time link with configuration options</h1>`
- After body:** A text area containing the following HTML code:

```
<br>
<br>
<hr>
<br>
<br>
<div class="intro">
  <a href="https://doc.puq.info">doc.puq.info</a>
  <br>
  <a href="https://www.puqcloud.com">www.puqcloud.com</a>
</div>
```
- Not relevant text:** A text area containing the following HTML code:

```
<h1>This link is no longer relevant.</h1>
<h1>Request a new link.</h1>
<br>
<div class="intro">
  <a href="https://doc.puq.info">doc.puq.info</a>
  <br>
  <a href="https://www.puqcloud.com">www.puqcloud.com</a>
</div>
```

**Lifetime in day** - Time in days during which a one-time link will be available

**Title** - The title of the one-time link page

The **CSS** field contains the CSS style that will be used on the one-time link page.

In the **Before body** field, the text that will be inserted on top of the entire page of the one-time link

In the **After body** field, the text that will be inserted at the bottom of the entire page of the one-time link

**Not relevant text** - The text that will be shown if the one-time link is not available or there is no link.

To reset the default settings, click the **Set default** button
