

Product Information

ReverseDNS module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

In the admin area, under the product management section, you can view a complete list of all client-assigned IP addresses and their corresponding rDNS records.

Just like in the client area, administrators have the ability to edit rDNS records directly from this interface.

All changes are instantly applied to the PowerDNS server.

The screenshot displays the WHMCS ReverseDNS module interface. At the top, there are two main sections: a form for adding new records and a summary of account details. The form includes fields for Domain, Dedicated IP, Username, Password, and Status (set to Active). Below the form are buttons for 'Create', 'Suspend', 'Unsuspend', and 'Terminate'. To the right, account details include Next Due Date (00/00/0000), Termination Date (N/A), Billing Cycle (Free), Payment Method (PayPal), and Promotion Code (None).

Below the form is a table of existing records. The table has columns for IP, rDNS, and Actions. The records are as follows:

IP	rDNS	Actions
192.168.1.1	mail.puqcloud.com.	Edit
192.168.1.10	test1.puqcloud.com.	Edit
192.168.1.100	test2.puqcloud.com.	Edit
192.168.1.101	test33.puqcloud.com.	Edit
192.168.1.102	test11.puqcloud.com.	Edit
192.168.1.103	test34.puqcloud.com.	Edit
192.168.1.104	testee.puqcloud.com.	Edit
192.168.1.105	test1.puqcloud.com.	Edit
192.168.1.106	dddd.puqcloud.com.	Edit
192.168.1.107	test1.puqcloud.com.	Edit

At the bottom of the table, it says 'Showing 1 to 10 of 257 entries' and a pagination control with 'Previous', '1', '2', '3', '4', '5', '...', '26', and 'Next'.
