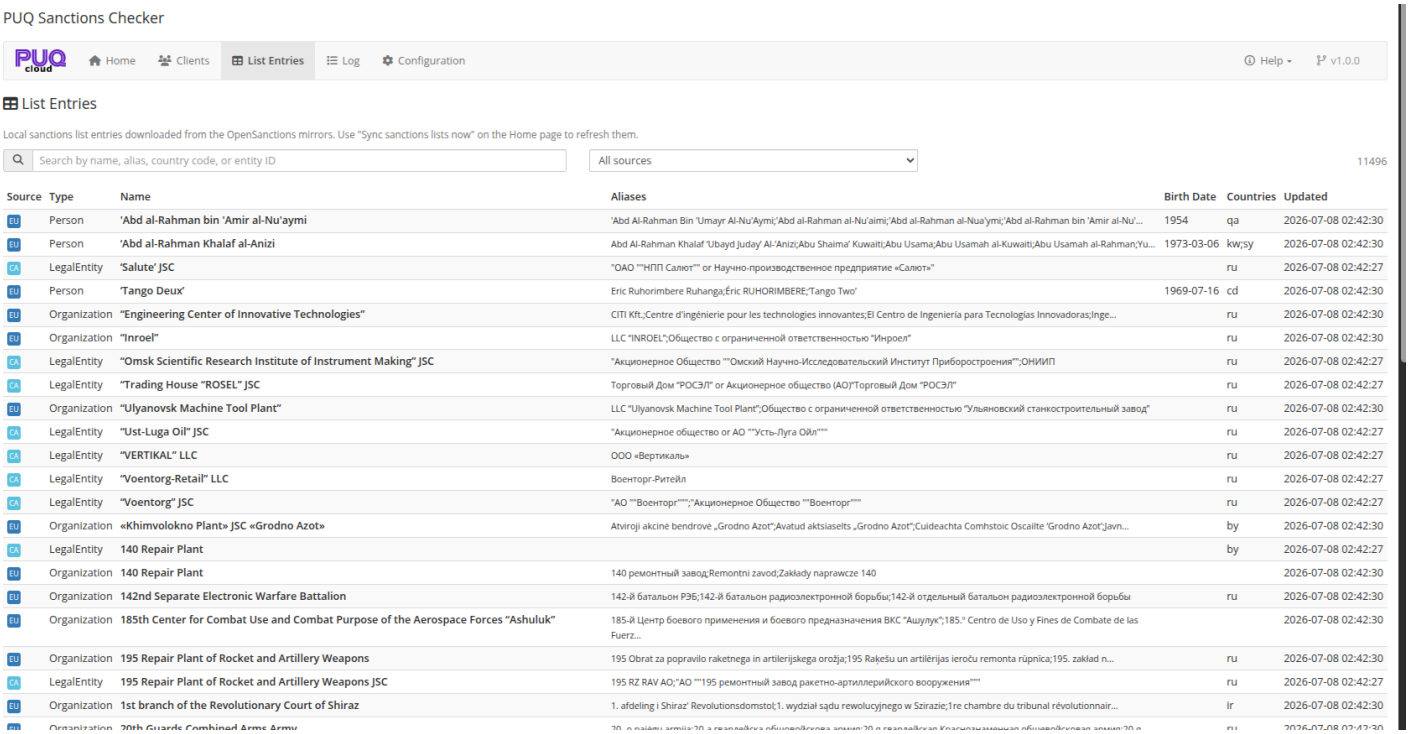
PUQ Sanctions Checker module **WHMCS**

Order now | Download | Community

Addons → Sanctions Checker → List Entries — everything the module downloaded from the OpenSanctions mirrors, so you can verify what exactly your clients are compared against.



- **Search** — live search by name, alias, country code, or entity ID (400 ms debounce).
- **Source filter** — all sources / Canada (DFATD-SEMA) / EU (FSF); the counter on the right shows the total.
- **Columns** — source badge (CA/EU), entity type (Person / Organization / LegalEntity), primary name, aliases (hover for the full list), birth date, countries, and the import time.
- 50 entries per page with Previous/Next paging.

The data refreshes automatically with the daily cron; **Sync sanctions lists now** on the Home page forces an immediate refresh.
