

Dashboard

Service Label Designer addon **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

The Dashboard is the home page of the module, available at: **Addons > PUQ Service Label Designer > Home**

It provides a complete overview of your label configuration — key metrics, enabled groups, and a live preview of how labels look on recent services.

The dashboard interface for PUQ Service Label Designer includes a navigation bar with 'Home', 'Config', and 'Designer' tabs, and a 'Help' icon. The main content area features a 'Dashboard' section with four key metrics cards: 34 Total Groups, 63 Total Products, 28 Active Services, and 4 Groups List Enabled. Below these are two more cards: 3 Groups Invoice Enabled. The 'Enabled Groups' section contains a table with columns for ID, Group Name, Active Services, Status, List Template, and Invoice Template. The 'Recent Services Preview' section contains a table with columns for ID, Product, Client, and Rendered Label.

ID	Group Name	Active Services	Status	List Template	Invoice Template
11	Synology	1	List Invoice append	{product-name} {group-name} <small>{service-domain} — {ser...	{product-name} - {service-domain} (IP: {service-dedicatedip}) {service-regdate} - {service-nextduedate}

Key Metrics

The top section displays summary cards:

Metric	Description
Total Groups	Number of product groups configured in WHMCS
Total Products	Number of products across all groups
Active Services	Services with Active status
Groups List Enabled	Number of groups with the client area list overwrite enabled
Groups Invoice Enabled	Number of groups with invoice text enabled

Enabled Groups

A table showing all product groups that have either List or Invoice overwrite enabled:

Column	Description
ID	Product group ID in WHMCS
Group Name	Name of the product group
Active Services	Number of active services in this group
Status	Badges indicating which features are enabled: List (blue), Invoice (orange), and the invoice mode (append/replace/prepend)
List Template	Preview of the overwrite list template (truncated)
Invoice Template	Preview of the invoice text template (truncated)

Recent Services Preview

A table showing the 5 most recent active services that belong to groups with List overwrite enabled:

Column	Description
ID	Service ID in WHMCS
Product	Product name and group name
Client	Client full name

Column	Description
Rendered Label	The actual rendered result of applying the template with real service data

This section lets you instantly see how your templates look in practice without navigating to the client area.
