

Support by Time WHMCS module

The module allows you to charge your customers with subscription fees for the support provided to them. The module allows you to prepare multiple packages with the number of hours and prices, and then settle the time spent on customer requests. Thanks to it You will know how long it takes to help each of your clients and you will be able to charge for the time you spend. You can do it in several ways - by setting up permanent subscriptions, where the module itself counts the amount of time still available to use or from the very beginning monitor the hours devoted to the execution of the application. The module also supports the settlement of overtime over a defined package with a separate hourly rate. Our module does not have an automatic time counter - the time consumption is entered manually by the technical operator when updating the ticket. This is the result of a well-thought-out decision and many years of our experience, and not a lack of technical capabilities.

Description

Support by Time module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

Preface

This module allows you to create a paid support service.

The module allows you to charge your customers with subscription fees for the support provided to them.

The module allows you to prepare multiple packages with the number of hours and prices, and then settle the time spent on customer requests. Thanks to it You will know how long it takes to help each of your clients and you will be able to charge for the time you spend. You can do it in several ways - by setting up permanent subscriptions, where the module itself counts the amount of time still available to use or from the very beginning monitor the hours devoted to the execution of the application.

The module also supports the settlement of overtime over a defined package with a separate hourly rate.

Our module does not have an automatic time counter - the time consumption is entered manually by the technical operator when updating the ticket. This is the result of a well-thought-out decision and many years of our experience, and not a lack of technical capabilities.

The mechanism was designed to make the most of the built-in mechanisms available in WHMCS and uses the Billable Items function.

The module does not require any additional services, servers apart from the basic installation of the WHMCS system

Functions:

- Support package hour's configuration (these hours are included in the price of the product and do not roll over to the next month).

- Possibility to configure the cost per hour of service after the hour packages are exhausted.
- Prices are configurable for all currencies that are available in your WHMCS installation.
- During the processing of tickets, the operator has the opportunity to add the number of hours that he spent on the implementation of this ticket. Gradation is 0.25 hours (15 minutes steps).
- It is possible to omit the use of time monitoring for some tickets and work with them in the standard way.
- It is possible to add a technical support product to the client, if it does not exist, directly from the ticket update window. This is done from the side of handling the request by the technical support operator. Thanks to this, you do not have to set the service for each client separately, but decide on a specific case.
- At the beginning of each month, the module calculates all hours of technical support for the previous month, taking into account package hours, then adds the necessary item to the client's Billable Items, which will be added to the invoice and sent to the client for payment by WHMCS system. This feature is designed so that you can make the most of the built-in WHMCS functionality.
- In the client area, the client has a complete history of all technical tickets with the time of their service. Also, all the data on the use of hours of technical support.
- In the administered zone, the operator has a complete history of all technical tickets with the time of their service. Also, all the data on the use of hours of technical support.

Changelog

Support by Time module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

v2.0 Released 23-09-2024

Module is coded ionCube v13

Supported php version:

- php 7.4 WHMCS 8.11.0 -
- php 8.1 WHMCS 8.11.0 +
- php 8.2 WHMCS 8.11.0 +

v1.3 Released 19-10-2023

1. Added the ability to delete reserved time positions in the admin panel.
2. Changed check of one-time packages, from daily cron to every cron, to change to terminator state.

v1.2.5 Released 11-10-2023

1. Supported WHMCS v8.8.0
2. Translations added/updated (**Arabic, Azerbaijani, Catalan, Chinese, Croatian, Czech, Danish, Dutch, English, Estonian, Farsi, French, German, Hebrew, Hungarian, Italian, Macedonian, Norwegian, Polish, Romanian, Russian, Spanish, Swedish, Turkish, Ukrainian**)

v1.2 Released 02-08-2023

1. Added the possibility of one-time support packages with a limit of hours
 2. The display of time in the client and admin zones is displayed in a human-readable format
 3. Other display and logic improvements
-

v1.1 Released 21-03-2023

1. Changes in design in the client area.
 2. Added translations
 3. Support WHMCS V8.6
 4. Support IonCube PHP Loader v12
 5. Support for PHP 8.1
 6. Support for PHP 7.4
 7. Added a field with a description of the position on the invoice
-

v1.0 Released 01-10-2022

setup(install/update)

Support by Time module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

Module is coded ionCube v13

Supported php version:

- php 7.4 WHMCS 8.11.0 -
- php 8.1 WHMCS 8.11.0 +
- php 8.2 WHMCS 8.11.0 +

To install and update a module, you must perform one and the same action.

1. Download the latest version of the module.

PHP 8.2

```
wget http://download.puqcloud.com/WHMCS/servers/PUQ_WHMCS-Support-by-time/php82/PUQ_WHMCS-Support-by-time-latest.zip
```

PHP 8.1

```
wget http://download.puqcloud.com/WHMCS/servers/PUQ_WHMCS-Support-by-time/php81/PUQ_WHMCS-Support-by-time-latest.zip
```

PHP 7.4

```
wget http://download.puqcloud.com/WHMCS/servers/PUQ_WHMCS-Support-by-time/php74/PUQ_WHMCS-Support-by-time-latest.zip
```

All versions are available via link:

http://download.puqcloud.com/WHMCS/servers/PUQ_WHMCS-Support-by-time/

2. Unzip the archive with the module.

```
unzip PUQ_WHMCS-Support-by-time-latest.zip
```

Copy

3. Copy and Replace "puqSupportByTime" from "PUQ_WHMCS-Support-by-time" to "WHMCS_WEB_DIR/modules/servers/"

Product Configuration

Support by Time module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

Purpose:

This module supports both One Time and Recurring billing cycles for services.

One Time Billing:

If you choose the One Time billing option, the service will remain active until the end of the purchased support hours package.

Recurring Billing:

If you choose the Recurring billing option, the support hours will be calculated on a monthly cycle basis.

Add new product to WHMCS

System Settings->Products/Services->Create a New Product

In the **Module settings** section, select the "**PUQ Support by Time**" module
