

# Product Configuration

## Support by Time module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

### Purpose:

This module supports both One Time and Recurring billing cycles for services.

### One Time Billing:

If you choose the One Time billing option, the service will remain active until the end of the purchased support hours package.

### Recurring Billing:

If you choose the Recurring billing option, the support hours will be calculated on a monthly cycle basis.

## Add new product to WHMCS

System Settings->Products/Services->Create a New Product

In the **Module settings** section, select the **"PUQ Support by Time"** module

Products/Services

Edit Product

---

## Support package setup

**Hours per month** - Indicates the number of hours that are included in the paid service package

**Invoice Action** - How WHMCS will create an invoice to the customer

- **Don't invoice for now** — Keep it in the client's account as an unbilled item.
- **Invoice on Next Cron Run** — Generate an invoice for it the next time your daily cron job runs.
- **Add to User's Next Invoice** — Add it to the next automated recurring renewal invoice that the system generates for products and services.

**Support package setup**

**Hours per month:**  h

**Invoice Action:**

Invoice on Next daily Cron ▼

How the invoice for the month of support will be issued.

---
