Add server (Synology NAS)

Synology module WHMCS

Order now | Download | FAQ

Add a new server to the system WHMCS.

System Settings->Servers->Add New Server

• Enter the correct Name and Hostname

• In the Server Details section, select the "PUQ Synology" module and enter the correct username and password for the Synology NAS web interface.

Editoschock, click the "Test connection" button

WARNING: **ACCESS HASH** field Used to store the access key to the server and is updated automatically.

| Module | ✓ Connection successful. Some values have been auto-filled. |
