WireGuard Business-VPN module **WHMCS**

Order now | Download | FAQ

Basic information on client panel page

Dedicated IP: The public IP address that is reserved for the service and through which all users of the VPN service will be represented on the Internet.

Private internal network: Private subnet whose IP addresses are available to the client to create VPN accounts. When adding a new VPN account, it will be assigned an IP address from this internal pool of addresses.

VPN Protocols: VPN protocols that are available

Number of VPN accounts: Number of used and available VPN client accounts from the pool available based on the defined package.

Bandwidtht download/upload: The bandwidth rate that will be available on each VPN client account

Add VPN account

WireGuard Business-VPN module **WHMCS**

Order now | Download | FAQ

This is how the page for adding a new VPN account looks like.

> Each VPN account has a unique client ID, the ID is generated according to the scheme <user_id>-<service_id>-Manually entered value. <user_id>-<service_id> are generated automatically by module. You can modify manually the last part.

To create a new account, the client must enter the following.

Username, Select an available IP address from the dropdown list. Then click the **Add VPN account** button.

Management VPN account

WireGuard Business-VPN module **WHMCS**

Order now | Download | FAQ

To manage/change your VPN account, click on the "Management" button on the selected account.

On the account management page you have the option.
