

# Port forwarding

## WireGuard Business-VPN module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

To manage port forwarding, click the Port forwarding button.  
In the page that opens, it is possible to add or delete rules to port forwarding.

The screenshot shows a user interface for managing a WireGuard Business-VPN. At the top, there is a bandwidth usage indicator showing 'download/upload' and '100/100 M'. Below this, there are two main sections: 'User manual' and 'Download VPN client'. Under 'Download VPN client', there are two green buttons: 'Add VPN account' and 'Port Forwarding'. The 'Port Forwarding' button is highlighted with a red rectangular box. Below these buttons, there is a status bar with a green checkmark, the IP address '1-4852-45 (10.0.22.4)', and status indicators for 'WireGuard online:' (not) and 'IKEv2 online: not'. A green 'Management' button with a pencil icon is located on the right side of the status bar.

	1-4852-45 (10.0.22.4)	WireGuard online: <b>not</b>	IKEv2 online: <b>not</b>	 Management
