

# Add server (PUQVPNCP) in WISECP

WireGuard Business-VPN module **WISECP**

[Order now](#) | [Download](#) | [FAQ](#)

1. Log in to the administrative area of your **WISECP**.
2. Go to module configuration.

Services -> Service Management -> Module Settings -> Other -> All Modules -> PUQ WireGuard Business-VPN

The screenshot displays the WISECP administrative dashboard. At the top, there is a navigation bar with the WISECP logo and a search bar. Below the navigation bar, there are several menu items: Settings, Orders (5), Billing, Clients, Tools, WAnalytics, Support, Services, Site Management, Languages, and Help. The 'Services' menu is currently selected, and its dropdown menu is visible, showing options like Service Management, Hosting Management, Domain Name Registration, Software Services, Add Group, Module Settings, Addons, and Order Requirements. The 'Module Settings' option is highlighted with a red underline. In the background, there are two summary cards: one for 'Today Sales (Turnover)' showing €0 and another for 'Current Cash' showing €0. The 'Current Cash' card also includes a sub-section for 'Current Month Expenses'.

#### 4. On the opened page, enter all the necessary information:

- **Name:** Displayed name of the server.
- **Maximum Number of Accounts:** The number of services that can be on this server.
- **Server Group:** Optionally, choose the server group.
- **Main Public IP Address:** is the public IP that will be used in those services which will utilize a single public IP for all.
- **DNS 1 and DNS 2:** are DNS servers that will be specified in the configuration of WireGuard clients.
- **IP Address or Domain:** The address of the PUQVPNCP server you are connecting to
- **Access Hash:** API key that you created in the previous step on the PUQVPNCP server. (IP addresses should be configured on the interfaces in PUQVPNCP.)
- Check the **SSL** box if you want to use SSL-encrypted connection. If necessary, specify the port and perform a connection test.
