

# Port Forwarding

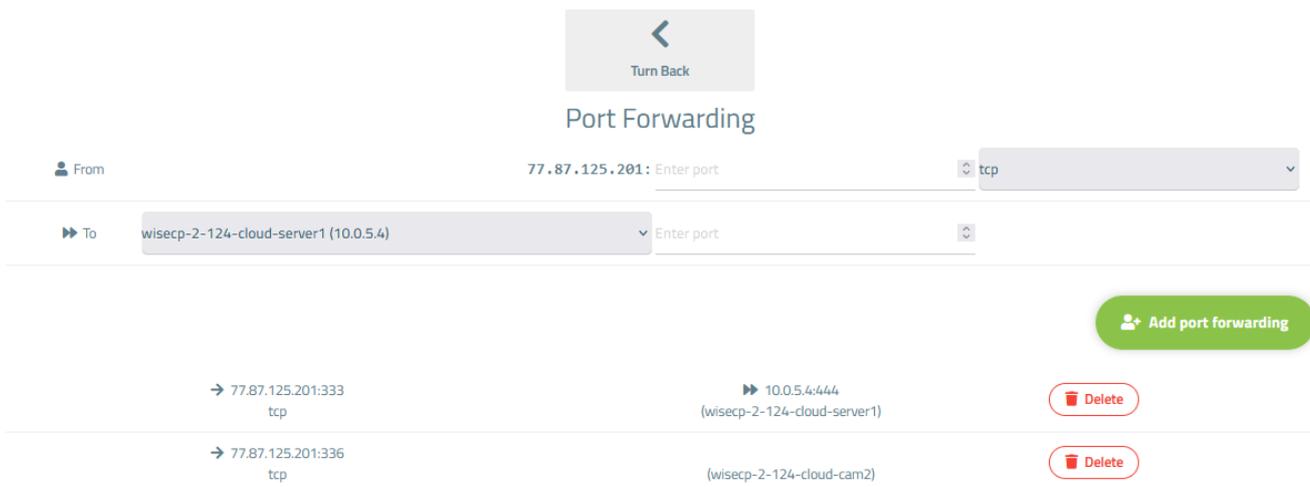

## WireGuard Business-VPN module **WISECP**

[Order now](#) | [Download](#) | [FAQ](#)

To access the port forwarding settings, you need to click on the "**Port Forwarding**" button on the main screen of the product.

To create a new port forwarding rule, enter the port you want to forward, select the protocol, choose the VPN account from the dropdown list to which the port will be forwarded, and enter the port to which the forwarding will occur. After filling in the details, press the "**Add Port Forwarding**" button.

The screenshot shows the 'Port Forwarding' configuration interface. At the top is a 'Turn Back' button. Below it, the title 'Port Forwarding' is centered. The form has two main sections: 'From' and 'To'. The 'From' section includes a port input field with '77.87.125.201' and a protocol dropdown menu set to 'tcp'. The 'To' section includes a dropdown menu for the VPN account (selected as 'wisecp-2-124-cloud-server1 (10.0.5.4)') and a port input field. A green 'Add port forwarding' button is located at the bottom right. Below the form, there is a list of existing rules. Each rule shows the source IP and port, the protocol, the destination IP and port, and a 'Delete' button.

From	Protocol	To	Action
→ 77.87.125.201:333 tcp	tcp	▶▶ 10.0.5.4:444 (wisecp-2-124-cloud-server1)	Delete
→ 77.87.125.201:336 tcp	tcp	(wisecp-2-124-cloud-cam2)	Delete
