

Port Forwarding

WireGuard Business-VPN module **WISECP**

[Order now](#) | [Download](#) | [FAQ](#)

To access the port forwarding settings, you need to click on the "**Port Forwarding**" button on the main screen of the product.

To create a new port forwarding rule, enter the port you want to forward, select the protocol, choose the VPN account from the dropdown list to which the port will be forwarded, and enter the port to which the forwarding will occur. After filling in the details, press the "**Add Port Forwarding**" button.

A screenshot of the 'Port Forwarding' configuration interface. At the top is a 'Turn Back' button with a left arrow. Below it is the title 'Port Forwarding'. The form has two main sections: 'From' and 'To'. The 'From' section has a field for '77.87.125.201: Enter port' and a dropdown menu for 'tcp'. The 'To' section has a dropdown menu for 'wisecp-2-124-cloud-server1 (10.0.5.4)' and a field for 'Enter port'. At the bottom right is a green 'Add port forwarding' button. Below the form is a list of two existing rules. Each rule shows the source IP and port, the protocol, the destination IP and name, and a 'Delete' button.

From	Protocol	To	Action
→ 77.87.125.201:333 tcp	tcp	▶▶ 10.0.5.4:444 (wisecp-2-124-cloud-server1)	Delete
→ 77.87.125.201:336 tcp	tcp	(wisecp-2-124-cloud-cam2)	Delete
