

Windows WireGuard client configuration

WireGuard Business-VPN module **WISECP**

[Order now](#) | [Download](#) | [FAQ](#)

In order to connect to a VPN, follow these steps:

1. Open the link you received in a browser to get instructions and configuration for your new VPN connection. And you will see the following page in the browser window

2. In order to start the configuration you need to download the configuration file. To

This is a one-time link with configuration options

3. Save the file to downloads or any other place to import later.

4. Since we are setting up a connection for an android device, we need the WireGuard client for Windows. To download the client on your device, open the link on your device and click "Download Client Windows".

5. Install the app on your device.

6. This is how the main window of the application looks like, which has no configured connections. To set up a new VPN connection, you must press the "Import tunnel(s) from file" button.

7. Next you will be prompted to find your configuration file. You need to find the configuration file and select it.

8. After you select your configuration file, the connection will be created.

9. Click the "Activate" button. To activate your VPN connection.

10. Congratulations. Your VPN connection is active.

The screenshot shows the WireGuard Windows client interface. At the top, there are tabs for 'Tunnels' and 'Log'. Below the tabs, a single tunnel named 'wg0' is listed with a green checkmark icon. The tunnel details are as follows:

Revision	Interface	Status	Public key
#2	wg0	Active	ONiIG3d481/SkKuOE9ErI6XL9Fs+bNEJz065GiFrmRc=

Additional information shown includes the creation and update timestamps: 'Created 25 November 2023 22:15:27 by Ruslan' and 'Updated 25 November 2023 22:17:26 by Ruslan'.
