WireGuard VPN module **WHMCS**

[Order now](#) | [Download](#) | [FAQ](#)

Client Area Description

Manage

Network Configuration:

- VPN Protocols:** Displays available VPN protocols such as WireGuard and IKEv2. The client will see the configuration for IKEv2 if available.
- Bandwidth download/upload:** Shows the bandwidth rate available for each VPN client account, which is set in the package.
- User manual:** Link to user manual or instructions for using the VPN service.
- Download VPN client:** Link to download the VPN client software.
- Create one-time link:** Button to generate a one-time link with connection parameters, useful for transferring connection settings to the end user.

WireGuard Configuration:

- Download Config:** Button to download the WireGuard configuration file.
- QR Code:** QR code containing the WireGuard configuration details.
- Configuration Details:** Displays detailed configuration settings such as address, DNS, private key, endpoint, public key, and allowed IPs.

IKEv2 Configuration:

- Download CA Certificate:** Button to download the IKEv2 CA certificate.
- Download Profile:** Button to download the IKEv2 profile.
- Server Details:** Displays the server address and username.
- Password:** Displays the password for the IKEv2 configuration.

Metrics

Usage Metrics:

- Bandwidth Usage In (GB):** Displays the current usage, pricing, and last update time for incoming bandwidth usage.
- Bandwidth Usage Out (GB):** Displays the current usage, pricing, and last update time for outgoing bandwidth usage.

Resource Usage: Usage metrics and their pricing information are displayed below.

- **Example:**
 - **Current Usage:** GB (In), GB (Out)
 - **Pricing:** Price / GB (set in the package)
 - **Last Update:** Time of last data update

Resource Usage

The screenshot shows a client panel interface with three tabs: 'Manage', 'Metrics', and 'Resource Usage'. The 'Resource Usage' tab is active, displaying a 'Bandwidth Usage' section. It shows a current usage of 3111MB / 1024MB, with a note that the limit is set in the package. Below this, there is a 'Last Updated' timestamp: 'Saturday, June 22nd, 2024 (11:00)'. The interface also features a 'Disk Space' section and a 'Bandwidth' section. The page is powered by WHMCompleteSolution.

Summary of the Client Panel Page

- **VPN Protocols:** Lists available VPN protocols like WireGuard and IKEv2.
- **Bandwidth download/upload:** Indicates the bandwidth rate assigned to each VPN client account, as set in the package.
- **User Manual and VPN Client Download:** Provides links to the user manual and VPN client download.
- **One-time Link Generation:** Allows the creation of a one-time link for sharing connection parameters.
- **WireGuard Configuration:** Shows configuration options for WireGuard, including downloading the config file and displaying QR code and detailed settings.
- **IKEv2 Configuration:** Shows configuration options for IKEv2, including downloading CA certificate and profile, and displaying server and login details.
- **Metrics Tab:** Displays detailed usage metrics for bandwidth usage, including current usage, pricing (e.g., 10.00 EUR / GB, set in the package), and last update time.
- **Resource Usage Tab:** Displays current usage of disk space and bandwidth with the bandwidth limit set in the package (e.g., 3111MB / 1024MB) and the last updated time.
