Add server (PUQVPNCP) in WISECP

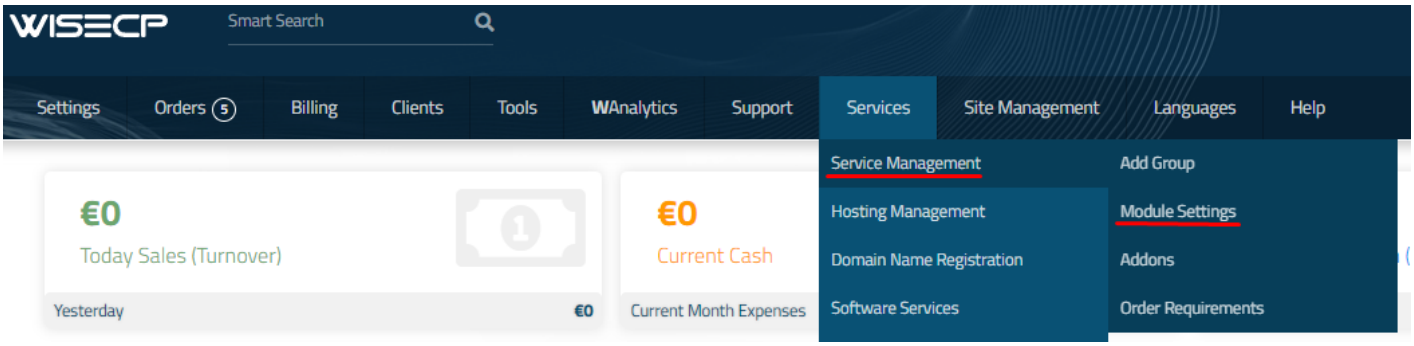

WireGuard VPN module **WISECP**

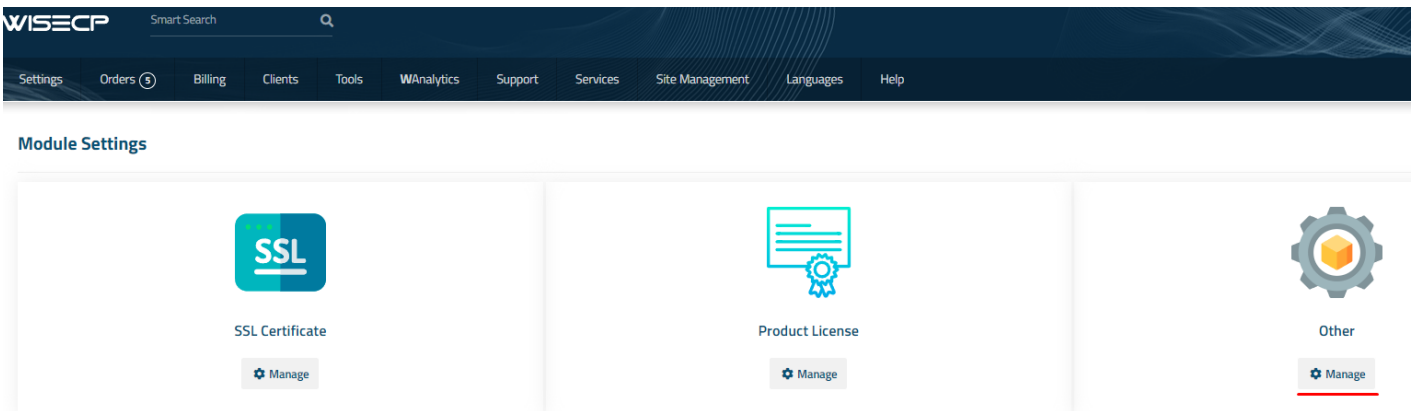

Order now | Download | FAQ

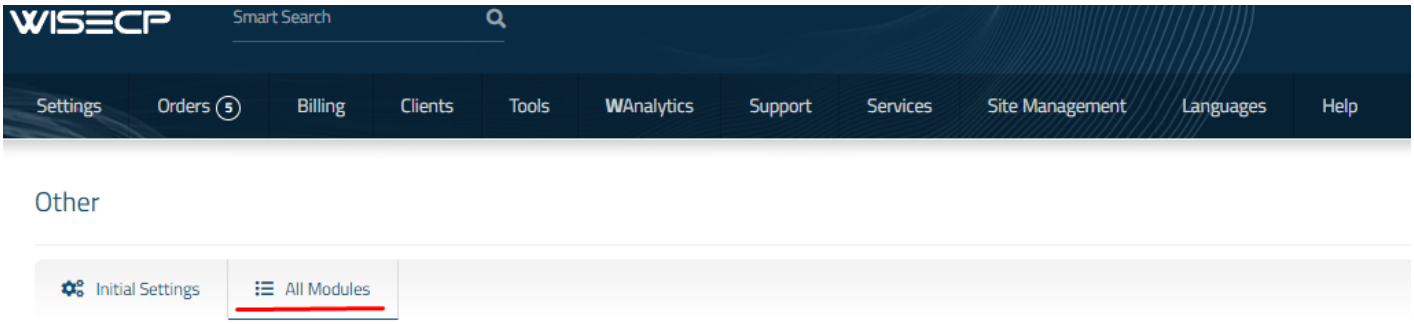

1. Log in to the administrative area of your **WISECP**.

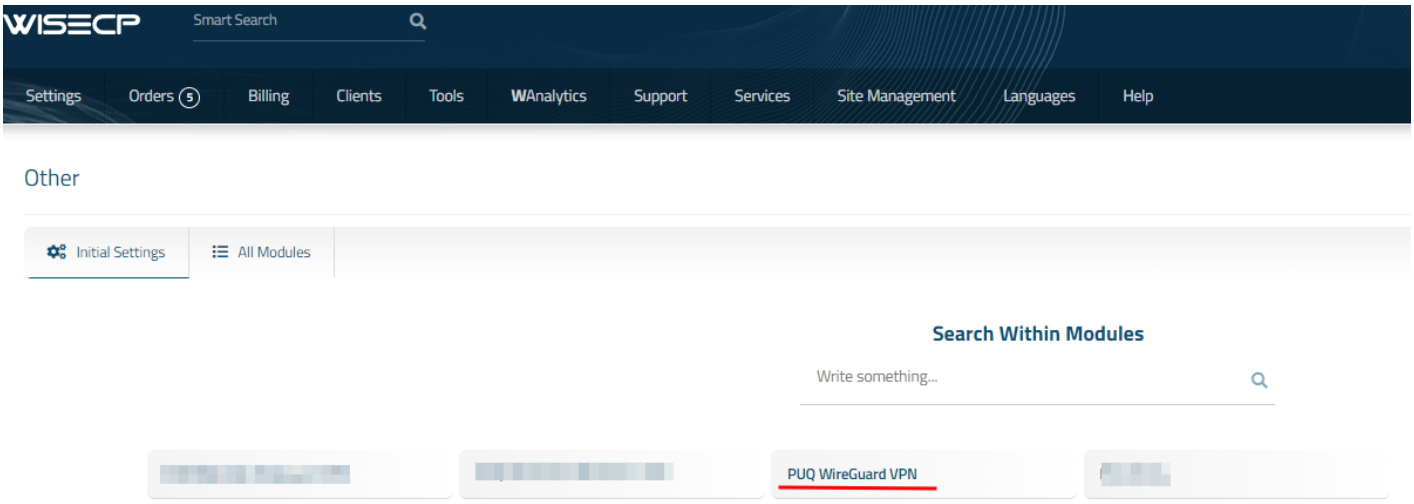

2. Go to module configuration.

```
Services -> Service Management -> Module Settings -> Other -> All Modules -> PUQ WireGuard VPN
```

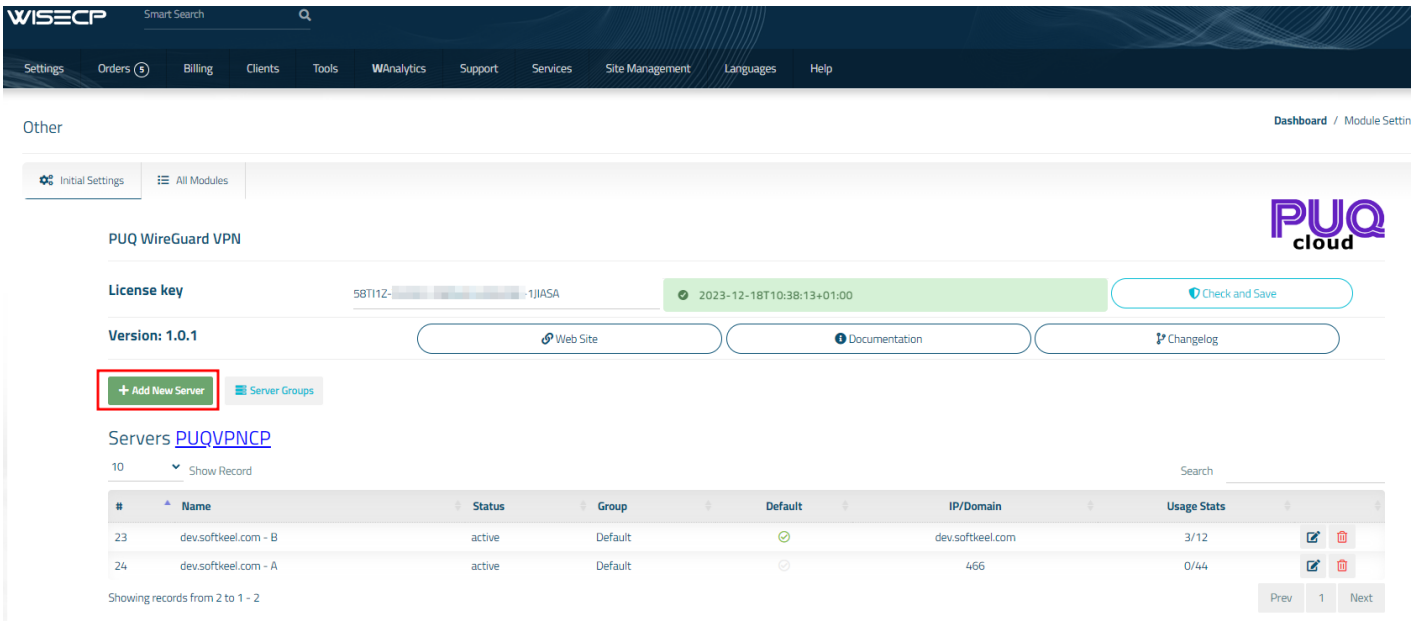

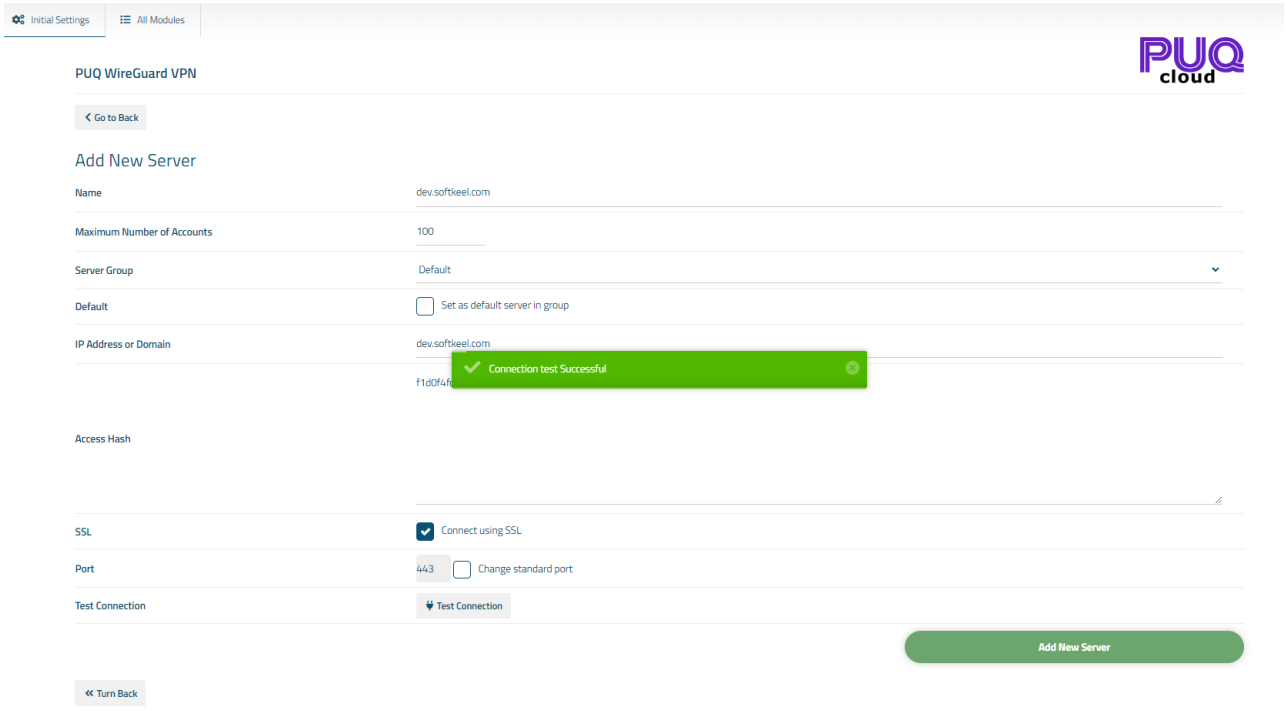

3. In the opened page, click the '**Add Server**' button.

4. On the opened page, enter all the necessary information:

- **Name**: Displayed name of the server.
- **Maximum Number of Accounts**: The number of services that can be on this server.
- **Server Group**: Optionally, choose the server group.
- **IP Address or Domain**: The address of the PUQVPNCP server you are connecting to.
- **Access Hash**: API key that you created in the previous step on the PUQVPNCP server.
- Check the **SSL** box if you want to use SSL-encrypted connection. If necessary, specify the port and perform a connection test.
