

# Service configuration

## WireGuard VPN module **WISECP**

[Order now](#) | [Download](#) | [FAQ](#)

If you do not have a **Service Group** where you want to place the new service, you need to create a new **Service Group**

1. Log in to the administrative area of your **WISECP**.
2. Create New Service Group

Go to

Services -> Service Management -> Add Group

The screenshot displays the WISECP administrative interface. At the top, there is a dark blue header with the WISECP logo and a 'Smart Search' bar. Below the header is a navigation menu with tabs: Settings, Orders (5), Billing, Clients, Tools, WAnalytics, Support, Services (selected), Site Management, Languages, and Help. The 'Services' tab is active, showing a sub-menu with 'Service Management' (selected), 'Hosting Management', 'Domain Name Registration', and 'Software Services'. The 'Service Management' sub-menu is further expanded, showing 'Add Group' (highlighted with a red underline), 'Module Settings', 'Addons', and 'Order Requirements'. On the left side of the dashboard, there are two widgets: 'Today Sales (Turnover)' showing a green '€0' and 'Yesterday' sales, and 'Current Cash' showing an orange '€0' and 'Current Month Expenses'.

Enter all the necessary data and click the '**Create Group**' button.

The screenshot shows the 'Create New Service Group' form in the WISECP dashboard. The form is titled 'Create New Service Group' and includes a green banner at the top stating: 'Create a new service group, you can also create new categories and manage the existing one from here.' The form is divided into two columns. The left column contains labels for various fields: Title, Short Detail, Listing Template, Status, Background Image, Group Colour, Order Upgrades, and External HTML Code. The right column contains the corresponding input fields: a text field for 'Title' with the value 'VPN', a text field for 'Short Detail' with the value 'Short Group Description', a radio button selection for 'Listing Template' (selected 'Box List', unselected 'Horizontal List'), a dropdown menu for 'Status' with the value 'Enable', a file upload area for 'Background Image' with a placeholder image and a trash icon, a text field for 'Group Colour' with the value '#FFFFFF', a checkbox for 'Order Upgrades' (unselected) with the label 'Allow clients to upgrade to higher package in the same service group', and a text area for 'External HTML Code' with the placeholder text 'Paste your HTML code to this field (Optional)'. At the bottom of the form, there is a small note: 'You can optionally add external HTML code and customize it. There should not be any incorrect or incomplete HTML codes, otherwise page structure will be empty.'

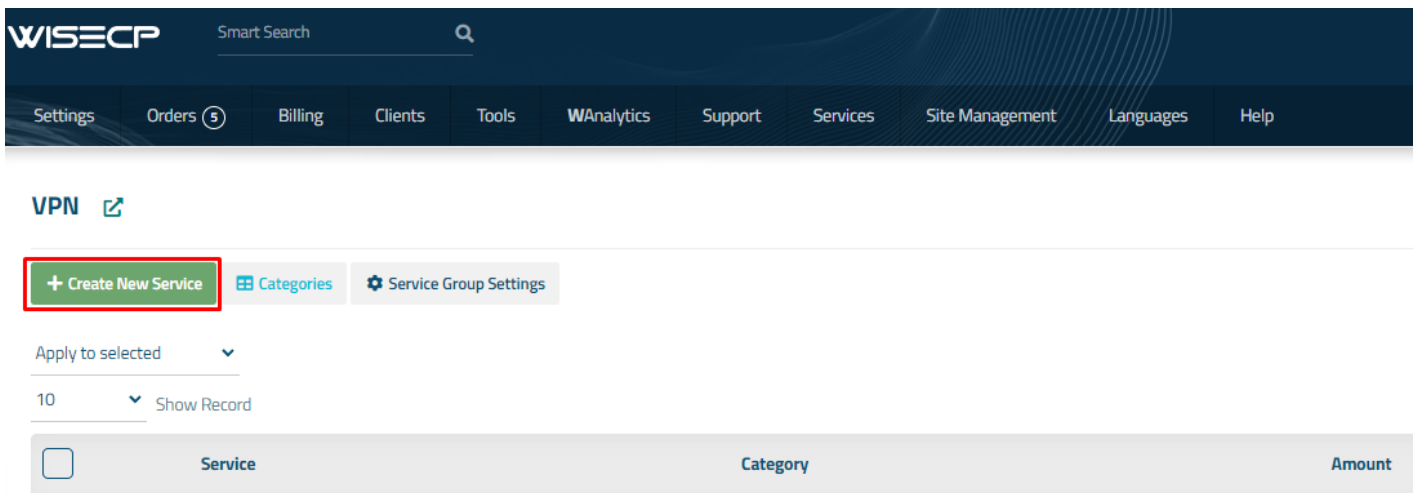

### 3. Adding a New Service

Go to

Services -> our service group where you need to add the new service.

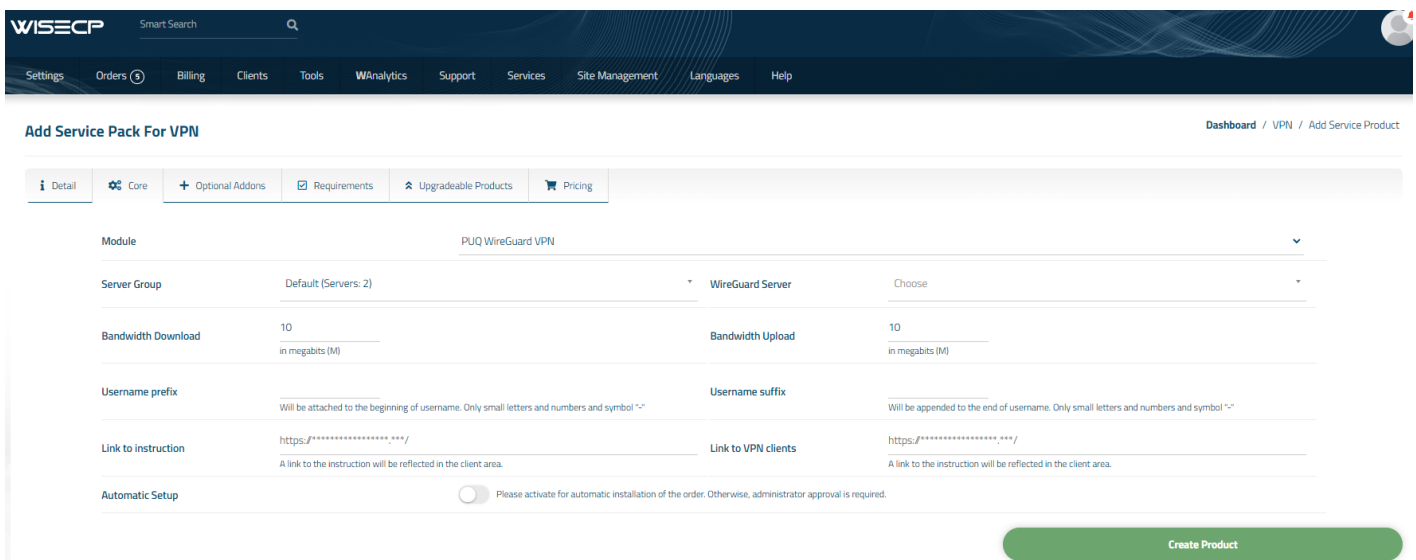

In the opened window, click the '**Create New Service**' button.

On the opened page, enter all the necessary details for your new service and navigate to the 'Core' tab.

Select the 'PUQ WireGuard VPN' module from the drop-down list of modules.

#### 4. Fill in the configuration options according to your preferences.

- **Server Group** is the group of servers from which a server will be chosen for provisioning the service
- **WireGuard Server** is the name of the WireGuard server that was created in PUQVPNC

##### Attention:

The **WireGuard Server** field is updated only after saving or adding the service. You will need to revisit this section to select the **WireGuard Server** and save the service. Additionally, the **WireGuard Server** must be created on all servers within the group.

- **Bandwidth Download** and **Bandwidth Upload** represent the connection speed that will be restricted by these parameters, in megabits per second, respectively.
- **Username Prefix** will be added at the beginning of the username during user creation

and is used for uniqueness

- **Username Suffix** will be added at the end of the username during user creation and is also used for uniqueness
- **Link to Instruction** Provide the link to the instruction for the service, and it will be displayed in the client area as a separate button
- **Link to VPN Clients** Provide the link to the page for downloading VPN clients for the service, and it will be displayed in the client area as a separate button
- **Automatic Setup** Please activate for automatic installation of the order. Otherwise, administrator approval is required.
