

Service configuration

WireGuard VPN module **WISECP**

[Order now](#) | [Download](#) | [FAQ](#)

If you do not have a **Service Group** where you want to place the new service, you need to create a new **Service Group**

1. Log in to the administrative area of your **WISECP**.
2. Create New Service Group

Go to

Services -> Service Management -> Add Group

The screenshot displays the WISECP administrative dashboard. At the top, there is a navigation bar with the WISECP logo and a search bar. Below the navigation bar, a menu contains various sections: Settings, Orders (5), Billing, Clients, Tools, WAnalytics, Support, Services, Site Management, Languages, and Help. The 'Services' section is currently selected, and its dropdown menu is open, showing options like Service Management, Hosting Management, Domain Name Registration, and Software Services. The 'Add Group' option under Service Management is highlighted with a red underline. On the left side of the dashboard, there are two summary cards: 'Today Sales (Turnover)' for 'Yesterday' and 'Current Cash' for 'Current Month Expenses', both showing a value of €0.

Enter all the necessary data and click the 'Create Group' button.

The screenshot shows the 'Create New Service Group' form in the WISECP system. The form is titled 'Create New Service Group' and includes a breadcrumb trail 'Dashboard / Create New Service Group'. A green banner at the top states: 'Create a new service group, you can also create new categories and manage the existing one from here.' Below this, there are language selection buttons for EN, UK, and PL. The form fields are as follows:

- Title:** VPN
- Short Detail:** Short Group Description
- Listing Template:** Box List Horizontal List
- Status:** Enable
- Background Image:** (optional) [Image upload area]
- Group Colour:** #FFFFFF
- Order Upgrades:** Allow clients to upgrade to higher package in the same service group
- External HTML Code:** Paste your HTML code to this field (Optional)

At the bottom of the form, there is a note: 'You can optionally add external HTML code and customize it. There should not be any incorrect or incomplete HTML codes, otherwise page structure will be empty.'

3. Adding a New Service

Go to

Services -> our service group where you need to add the new service.

In the opened window, click the 'Create New Service' button.

VPN

+ Create New Service Categories Service Group Settings

Apply to selected
10 Show Record

Service	Category	Amount
---------	----------	--------

On the opened page, enter all the necessary details for your new service and navigate to the 'Core' tab.

Select the 'PUQ WireGuard VPN' module from the drop-down list of modules.

Create Product

4. Fill in the configuration options according to your preferences.

- **Server Group** is the group of servers from which a server will be chosen for provisioning the service
- **WireGuard Server** is the name of the WireGuard server that was created in PUQVPCP

Attention:

The **WireGuard Server field** is updated only after saving or adding the service. You will need to revisit this section to select the **WireGuard Server** and save the service. Additionally, the **WireGuard Server** must be created on all servers within the group.

- **Bandwidth Download** and **Bandwidth Upload** represent the connection speed that will be restricted by these parameters, in megabits per second, respectively.
- **Username Prefix** will be added at the beginning of the username during user creation

and is used for uniqueness

- **Username Suffix** will be added at the end of the username during user creation and is also used for uniqueness
- **Link to Instruction** Provide the link to the instruction for the service, and it will be displayed in the client area as a separate button
- **Link to VPN Clients** Provide the link to the page for downloading VPN clients for the service, and it will be displayed in the client area as a separate button
- **Automatic Setup** Please activate for automatic installation of the order. Otherwise, administrator approval is required.
