Windows WireGuard client configuration

WireGuard VPN module **WISECP**

Order now | Download | FAQ

In order to connect to a VPN, follow these steps:

1. Open the link you received in a browser to get instructions and configuration for your new VPN connection. And you will see the following page in the browser window
2. In order to start the configuration you need to download the configuration file. To download the configuration file click the "Download config" button.
3. Save the file to downloads or any other place to import later.
4. Since we are setting up a connection for an android device, we need the WireGuard client for Windows. To download the client on your device, open the link on your device and click "Download client Windows".
5. Install the app on your device.
6. This is how the main window of the application looks like, which has no configured connections. To set up a new VPN connection, you must press the "Import tunel(s) from file" button.
7. Next, you will be prompted to find your configuration file. You need to find the configuration file and select it.
8. After you select your configuration file, the connection will be created.
9. Click the "Activate" button. To activate your VPN connection.
10. Congratulations. Your VPN connection is active.
